THE STANDARD REFERENCE WORK ON PAPER MONEY This landmark work is the standard reference on American currency. It is internationally acknowledged as the most comprehensive and universally recognized guide on the subject, illustrating and valuating all types of United States paper money. From the first year of Federal paper money, 1861, to the present, the fronts and backs of all classes and types of currency, from 3 cents to 10,000 dollars are illustrated. These are accompanied by text listing, describing and pricing every variety of paper money ever issued. The result is a complete pictorial, descriptive and numismatic history of the currency of the United States. There are sections on Colonial and Continental currency (notes issued from 1680 to 1788), and a complete listing by type of the issues of the Confederate States of America (1861-1864). Both are illustrated and have market values in several states of preservation. Also included are chapters on error notes, encased postage stamps and postage envelopes. Every illustration is reproduced in color. And for those who think of America ' s currency as a constant study in green and black, the rainbow-like diversity is a revelation. It is a complete collection of United States currency, many of the notes in the finest state of preservation possible and some so extremely rare that they may only be seen either on these pages or in an exhibition. A distinguished panel of acknowledged experts on paper money assisted the authors, enabling them to establish accurate and up-to-the minute valuations for all issues. The publication of Paper Money of the United States introduced innovations never before attempted. Robert Friedberg (1912-1963) was the first to standardize this subject and gave this book a permanent place on reference shelves. For the past thirty years, it has been completely revised and edited by Arthur Friedberg and Ira Friedberg.

A Complete Illustrated Guide with Valuations large size notes, fractional currency, small size notes, encased postage stamps from the first year of paper money (1861) to the present confederate states notes, colonial and continental currency The standard reference work on paper money

A new collection of philosophical biographies of key figures in Black Southern American social and political thought Frederick Douglass, Booker Washington and Ida Wells. Thurgood Marshall and Martin King are focused upon, together with Howard Thurman, Richard Wright, Fred Gray and Barbara Jordan. All are important in various ways to the movements this book seeks out. From the perspective of liberation, the two high points in the African-American Odyssey are marked by Emancipation in the nineteenth century and Desegregation in the twentieth. Douglass bestriding the first, King and Marshall the second. The thread of resistance runs through most of these philosophical profiles, and the thread of non-violence, with greater or less force, also runs throughout. This volume assumes a distinction between (a) an earlier period when Afro-America was more cohesive and collectively committed to self-improvement despite the odds, and (b) the contemporary period, beyond desegregation, marked by rates never previously rivaled of suicide, joblessness, imprisonment, despair and alienation, especially among black poor. The life stories and philosophies presented here make fascinating reading. This book is a Special Issue of the leading journal, Critical Review of International Social and Political Philosophy.
