"From Academy Award-nominated producer Brian Grazer and acclaimed business journalist Charles Fishman comes a brilliantly entertaining peek into the weekly "curiosity conversations" that have inspired Grazer to create some of America's favorite and iconic movies and television shows--from 24 to A Beautiful Mind. For decades, film and TV producer Brian Grazer has scheduled a weekly "curiosity conversation" with an accomplished stranger. From scientists to spies, and adventurers to business leaders, Grazer has met with anyone willing to answer his questions for a few hours. These informal discussions sparked the creative inspiration behind many of Grazer's movies and TV shows, including Splash, 24, A Beautiful Mind, Apollo 13, Arrested Development, 8 Mile, J. Edgar, and many others. A Curious Mind is a brilliantly entertaining, fascinating, and inspiring homage to the power of inquisitiveness and the ways in which it deepens and improves us. Whether you're looking to improve your management style at work or you want to become a better romantic partner, this book--and its lessons on the power of curiosity--can change your life"--

#1 New York Times bestselling author and Oscar-winning producer Brian Grazer has written a brilliantly entertaining and eye-opening exploration of curiosity and the life-changing effects it can have on every person’s life. From Academy Award-winning producer Brian Grazer, New York Times bestseller *A Curious Mind* offers a brilliant peek into the “curiosity conversations” that inspired him to create some of the world’s most iconic movies and television shows. He shows how curiosity has been the “secret” that fueled his rise as one of Hollywood’s leading producers and creative visionaries, and how all of us can channel its power to lead bigger and more rewarding lives. Grazer has spent most of his life exploring curiosity through what he terms “curiosity conversations” with some of the most interesting people in the world, including spies, royals, scientists, politicians, moguls, Nobel laureates, artists...anyone whose story might broaden his worldview. These discussions sparked the creative inspiration behind many of his movies and TV shows, including *Splash*, *24*, *A Beautiful Mind*, *Apollo 13*, *Arrested Development*, *8 Mile*, *J. Edgar*, *Empire*, and many others. *A Curious Mind* is not only a fascinating page-turner—it also offers a blueprint for how we can awaken our own curiosity and use it as a superpower in our lives. Whether you’re looking to strengthen your management style at work, uncover a new source of creativity, or become a better romantic partner, this book—and its lessons on the power of curiosity—can change your life.

NEW YORK TIMES BESTSELLER • A captivating exploration of deep time and humanity's search for purpose, from the world-renowned physicist and best-selling author of *The Elegant Universe*. "Few humans share Greene’s mastery of both the latest cosmological science and English prose." —*The New York Times* Until the End of Time is Brian Greene's breathtaking new exploration of the cosmos and our quest to find meaning in the face of this vast expanse. Greene takes us on a journey from the big bang to the end of time, exploring how lasting structures formed, how life and mind emerged, and how we grapple with our existence through narrative, myth, religion, creative expression, science, the quest for truth, and a deep longing for the eternal. From particles to planets, consciousness to creativity, matter to meaning—Brian Greene allows us all to grasp and appreciate our fleeting but utterly exquisite moment in the cosmos.

With his mother working long hours and in pain from a romantic break-up, eighteen-year-old Logan feels alone and unloved until a zany new student arrives at his small-town Missouri high school, keeping a big secret.

A Curious Mind by Brian Grazer and Charles Fishman | A Review *A Curious Mind*, by Brian Grazer and Charles Fishman, is an examination of the impact of curiosity on Grazer's life and movie production career. In a memoir style, he describes how his curiosity gave him the opportunity to leave law school for a law clerk position with Warner Bros. He used his position to meet with famous people and encourage them to speak to him on a variety of topics, meetings he would later refer to as "curiosity conversations". He later embarked on his goal of becoming a movie producer, working on films and producing his first successful movies with Ron

Howard directing in the early 1980s. Grazer continued to set up curiosity conversations that often inspired him and helped him to improve the movies he produced. Eventually, curiosity conversations become such a significant part of Grazer's life that he hired a full-time assistant to arrange these brief one-on-one meetings with interesting people. Grazer conducted almost 500 curiosity conversations in the course of his 35 year career. This companion to A Curious Mind includes: Overview of the book Character Analysis A Discussion on Themes and much more!

From the author of Ahead of the Curve, a revelatory look at successful selling and how it can impact everything we do The first book of its kind, The Art of the Sale is the result of a pilgrimage to learn the secrets of the world's foremost sales gurus. Bestselling author Philip Delves Broughton tracked down anyone who could help him understand what it took to achieve greatness in sales, from technology billionaires to the most successful saleswoman in Japan to a cannily observant rug merchant in Morocco. The wisdom and experience Broughton acquired, revealed in this outstanding book, demonstrates as never before the complex alchemy of effective selling and the power it has to overcome challenges we face every day.

Today it seems we have the world at our fingertips. Thanks to smartphones and tools such as Google and Wikipedia, we're able feed any aspect of our curiosity instantly. But does this mean we are actually becoming more curious? Absolutely

Get Free A Curious Mind By Brian Grazer And Charles Fishman A Review By Eureka Books

not. In *Curious*, Ian Leslie argues that true curiosity—the sustained quest for understanding that begets insight and innovation—is becoming increasingly difficult to harness in our wired world. We confuse ease of access to information with curiosity, and risk losing our ability to ask questions that extend our knowledge gap rather than merely filling it. Worst of all, this decline in curiosity has led to a decline in empathy and our ability to care about those around us. Combining the latest science with an urgent call to cultivate curious minds, *Curious* draws on psychology, social history, and popular culture to show that being deeply curious is our only hope when it comes to solving current crises—as well as an essential part of being human.

Astrophysicist and author Mario Livio investigates perhaps the most human of all our characteristics—curiosity—in this “lively, expert, and definitely not dumbed-down account” (Kirkus Reviews) as he explores our innate desire to know why. Experiments demonstrate that people are more distracted when they overhear a phone conversation—where they can know only one side of the dialogue—than when they overhear two people talking and know both sides. Why does half a conversation make us more curious than a whole conversation? “Have you ever wondered why we wonder why? Mario Livio has, and he takes you on a fascinating quest to understand the origin and mechanisms of our curiosity. I thoroughly recommend it.” (Adam Riess, Nobel Prize Winner in Physics, 2011). Curiosity is not only at the heart of mystery and suspense novels, it is also essential to other creative endeavors, from painting to sculpture to music. It is the principal driver of basic scientific research. Even so, there is still no definitive scientific consensus about why we humans are so curious, or about the mechanisms in our brain that are responsible for curiosity. In the ever-fascinating *Why?* Livio interviewed scientists in several fields to explore the nature of curiosity. He examined the lives of two of history’s most curious geniuses, Leonardo da Vinci and Richard Feynman. He also talked to people with boundless curiosity: a superstar rock guitarist who is also an astrophysicist; an astronaut with degrees in computer science, biology, literature, and medicine. What drives these people to be curious about so many subjects? An astrophysicist who has written about mathematics, biology, and now psychology and neuroscience, Livio has firsthand knowledge of his subject which he explores in a lucid, entertaining way that will captivate anyone who is curious about curiosity.
