...

Paulos is a witty and brilliant mathematician whose understanding of the stock market proves that he doesn't understand finance like he does partial differential equations. He writes about an affair he had with WorldCom stock during the demise of its stock—losing the greater portion of his portfolio.

So a reader of A mathematician plays the market can perhaps be forgiven for gloating slightly upon learning that even the great Paulos succumbed to one of the most debilitating attacks of collective madness in recent history - the dotcom boom. In this book he describes how he lost large sums (just how large is never stated)
