So, in few words, game theory is the study of taking optimal decisions in presence of multiple players (agents). Thus a game is a simplified, yet very efficient, model of real life every day situations. Though the first, and probably more intuitive, applications of the theory were in an economical setting, theoretical models and tools of this ...

Football game 1 2 Boxing Match 3 0 Hike 0 1 For Let denote the probability of rain. (a) Is there an alternative that a rational player will never take regardless of π (i.e., it is dominated for any $\pi \in [0, 1]$.) Answer: For this decision maker choosing the hike is always worse (dominated) by going to the football game, and he should never go on

~~Solution Manual Game Theory: An Introduction~~
Game theory is the study of multiperson decision problems. Such problems arise frequently in economics. As is widely appreciated, for example, oligopolies present multiperson problems — each firm must consider what the others will do. But many other
