The material presented within these pages will help you unlock your brain's amazing power. You change, the competition changes, and the world changes. What can not change is your determination to continue investing in yourself. Release your inner genius and become the student you were always meant to be!

We live in an era when the unprecedented speed of change means: The only certainty is uncertainty; you can't predict what skills will be useful in ten years time; in most professions knowledge is doubling every two or three years; and no job is forever--so being employable means being flexible and retraining regularly. Accelerated Learning into the 21st Century contains a simple but proven plan that delivers the one key skill that every working person, every parent and student must master, and every teacher should teach: it's learning how to learn. The theory of eight multiple intelligences (linguistic, logical-mathematical, visual-spatial, kinesthetic, musical, interpersonal, intrapersonal, and naturalist) developed by Howard Gardner at Harvard University provides a foundation for the six-step MASTER-Mind system to facilitate learning (an acronym for Mind, Acquire, Search, Trigger, Exhibit, and Review), and is enhanced by the latest findings on the value of emotion and memory on the process of learning. Combined with motivational stories of success applying these principles, and putting forth a clear vision of how the United States can dramatically improve the education system to remain competitive in the next century, Accelerated Learning into the 21st Century is a dynamic tool for self-improvement by individuals as diverse as schoolchildren and corporate executives.

Your mind will be sharper, clearer and faster than you've ever experienced it before. Discover how to learn with these accelerated techniques. Get the guide and start learning! Book Sample: The basis of this book is on the general inclusive idea that we all possess the potential to succeed, but the majority of us only utilize a minor fraction of our minds and potential. Creative thinking and time are essential factors in recent times, and mastering the art of learning is the most important skill, with the brain as the major organ involved. We only begin to flourish when we start to learn faster and more efficiently. Almost all of us have little understanding of the key role our minds play in maximizing our productivity; we are not trained on how to learn or how to employ our learning skills. Although much has been discovered in the previous decades about the brain and its mechanism of action, these discoveries have superseded every other discovery about the brain. Very little of this knowledge is still applied in our personal and daily lives. It is entirely possible for all of us to learn speedily, be more resourceful at work, and be more accomplished. It translates our knowledge of how the brain works into beneficial knowledge for the workplace. It is a well-established fact that intelligence is multifaceted and not set at birth. It derives inspiration from the widest range of subject field-from psychology to neuroscience, theories of motivation to advanced learning, and memory to nutrition. Learning is an acquired skill. Acquiring the skills to learn is a kind of "learnacy" we all need. Our Book Covers the following topics: Accelerated Learning Techniques Accelerated Learning Accelerated Learning Mastery Cognitive Behavioral Therapy Emotional Intelligence 2.0 Accelerated Learning Memory Memory Improvement
