A history text of America's colonial period, emphasizing the interaction of three cultures--colonialists, Indians, and Blacks.

Our past is changing. In all branches of American history, scholars and writers are going back to find the people missing from our history texts...the minorities, the women, the labourers, the not-so-famous creators of America. The history emerging from this intellectual energy is, like the nation itself, vital and democratic. It's also a history far more meaningful to today's students, a fact clearly demonstrated by the overwhelming popularity of the American people-the first major text to combine an exceptionally high level of scholarship with the new, more "democratic" view of history. Now this groundbreaking text is available in a brief edition. Carefully abridged to preserve the widely-acclaimed balanced approach and distinctive voice of the full-length text.

This book provides an alternative to the more conventional modes of qualitative and quantitative inquiry currently used in professional training programs, particularly in education. It features a very accessible presentation that combines application, rationale, critique, and inspiration—and is itself an example of this kind of writing. It teaches students how to use personal writing in order to analyze, explicate, and advance their ideas. And it encourages minority students, women, and others to find and express their authentic voices by teaching them to use their own lives as primary resources for their scholarship.
