It does not matter which class book you want. In here I am sharing all NCTB Books of Class 1, Class 2, Class 3, Class 4, Class 5, Class 6, Class 7, Class 8, Class 9 and Class 10. In here you can download all official books of NCTB. Some of the users message us for upload new NCTB Books 2020 for both Bangla and English version. But the authority of National curriculum and textbook board till not ...

Many take advantage of software and hardware accessibility in the English language. However, for non native speakers, this inevitably becomes a problem; specifically for the complex Bangla language which is not easily integrated into the world of technology. Technical Challenges and Design Issues in Bangla Language Processing addresses the difficulties as well as the overwhelming benefits associated with creating programs and devices that are accessible to the speakers of the Bangla language. Professionals, students, and researchers interested in expanding the fields of computing, information and knowledge management, and communication technologies in the non-English realm will benefit from this comprehensive collection of research.

This book addresses the research, analysis, and description of the methods and processes that are used in the annotation and processing of language corpora in advanced, semi-advanced, and non-advanced languages. It provides the background information and empirical data needed to understand the nature and depth of problems related to corpus annotation and text processing and shows readers how the linguistic elements found in texts are analyzed and applied to develop language technology systems and devices. As such, it offers valuable insights for researchers, educators, and students of linguistics and language technology.

The new edition of the book Study Guide for CTET Paper 2 - English 4th edition (Class 6 - 8 Social Studies/ Social Science teachers), has been updated with the CTET Solved Papers of July 2013 to Sep 2018. • The languages covered in the book are English (1st language) and Hindi (2nd language). • The book provides separate sections for Child Development & Pedagogy, English Language, Hindi Language and Social Studies/ Social Science. • Each section has been divided into chapters. For each chapter an exhaustive theory has been provided which covers the complete syllabus as prescribed by the CBSE/ NCERT/ NCF 2005. • This is followed by 2 sets of exercise. • The exercise 1 contains a set of MCQs from the PREVIOUS YEAR Question Papers of CTET and various STET's. • The exercise 2, "TEST YOURSELF" provides carefully selected MCQs for practice. • The book is a must for all the candidates appearing in the Paper 2, Social Studies stream of the CTET and State TETs like UPTET, Rajasthan TET, Haryana TET, Bihar TET, Uttarakhand TET, Punjab TET, Tamil Nadu TET etc.

Teaching without responsive learning is just like one-way traffic. Teachers ask how to go about teaching beyond traditional classroom approaches and Educational Concepts to Guide Students at Home. Complacency is a big obstacle to great success in life which starts from school. Even the best teacher cannot guarantee a hundred percent thorough learning experience in class. The question of how much we have read is not important in comparison to what we learnt in relation to the application of the subject matter. Take care of today and tomorrow will be taken care of. Plan your lesson well for a ship without radar is a student without a plan. Take care of a small line and the whole syllabus will be taken care of. A student who enjoys life too much now, cries in the end. A tiny atom of learning today can make an atom bomb out of your knowledge tomorrow. This method starts where class teaching ends.

This book features research papers presented at the International Conference on Emerging Technologies in Data Mining and Information Security (IEMIS 2020) held at the University of Engineering & Management, Kolkata, India, during July 2020. The book is organized in three volumes and includes high-quality research work by academicians and industrial experts in the field of computing and communication, including full-length papers, research-in-progress papers and case studies related to all the areas of data mining, machine learning, Internet of things (IoT) and information security.
