Instant Notes in Developmental Biology provides concise yet comprehensive coverage of developmental biology at an undergraduate level, as well as easy access to the core information in the field. It presents 70-80 topics covering the fundamental information in both animals and plants that every student needs to know. Straightforward diagrams present important concepts, which are easy to remember and reproduce. A "Key Notes" section at the start of each topic highlights the important facts, and also acts as a memory prompt for examinations. It also features multiple choice questions and answers to test understanding. Aimed at students in the life sciences taking courses in developmental biology, Instant Notes in Developmental Biology covers all important areas in the field in a format that is ideal for learning and rapid revision

Instant Notes in Motor Control, Learning and Development provides an overview of how the brain and nervous system control movement, and how new movements are learned and improved. The early chapters set the scene by defining the field and discussing the measurement of movement. This leads to chapters that explain how we control movement and learn to control movement. The final section considers the development of motor skills. The topics covered in this text provide foundation knowledge that is vital for any individual who is working in the movement context as a teacher, coach, or therapist. Each chapter can be read in isolation but links are made and related topics highlighted. Due to the wide range of information contained in the book, it will be relevant to students studying all sports-related courses, including sport coaching courses.

This is a student-friendly compendium of the essentials of animal biology, including the Animal Kingdom, comparative physiology, reproductive physiology and developmental biology.

Instant Notes in Cognitive Psychology is a concise summary of the key theoretical and empirical topics in cognitive psychology, providing easy access to the core information in the field. The book can serve as a core text, supplemented by readings in the original literature, as a reference guide for students and lecturers alike, or as an ideal revision guide prior to exams. Instant Notes in Cognitive Psychology is intended primarily for students taking a first course in the subject, but can also be used as an introduction to the field for undergraduates and graduates from other subject areas.

The second edition of Instant Notes in Bioinformatics introduced the readers to the themes and terminology of bioinformatics. It is divided into three parts: the first being an introduction to bioinformatics in biology; the second covering the physical, mathematical, statistical and computational basis of bioinformatics, using biological examples wherever possible; the third describing applications, giving specific detail and including data standards. The applications covered are sequence analysis and

annotation, transcriptomics, proteomics, metabolite study, supramolecular organization, systems biology and the integration of-omic data, physiology, image analysis, and text analysis.

Instant Notes in Chemistry for Biologists is a concise book for undergraduates who have a limited background in chemistry. This book covers the main concepts in chemistry, provides simple explanations of chemical terminology, and illustrates underlying principles and phenomena in the life sciences with clear biological examples. Building on the success of the first edition, the second edition has been fully revised and updated and comprises new sections on water as a biological solvent, inorganic molecules and biological macromolecules.

The second edition of Instant Notes in Neuroscience covers neuroanatomy, cellular and molecular neuroscience, systems neuroscience, behavior, development of the nervous system, learning, memory, and common brain disorders. It gives rapid and easy access to the core of the subject in an affordable and manageable-sized text.

Instant Notes in Medicinal Chemistry provides concise coverage for undergraduates studying medicinal chemistry as part of a science, pharmacy or medical course. It is a truly multidisciplinary subject involving such subject specialities as organic chemistry, pharmacology, biochemistry, physiology, microbiology, toxicology, genetics and computer mod

BIOS Instant Notes in Immunology, Third Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts-an ideal revision checklist-followed by a description of the subject that focuses on core information, with clear,
