This guide to SAP BusinessObjects Dashboards 4.0 (formerly Xcelsius )is a cookbook packed full of practical recipes written in a clear, concise manner with annotated examples to empower readers to quickly accomplish specific dashboard tasks. If you are a developer with a good command and knowledge of creating dashboards, but are not yet an advanced Dashboard Design user, then this is the perfect book for you. You should have a good working knowledge of Microsoft Excel as well as knowledge of basic dashboard practices, though experience of Dashboard Design as a specific dashboard tool is not essential.

If you are a developer with a good command and knowledge of creating dashboards, but are not yet an advanced user of SAP BusinessObjects Dashboards, then this is the perfect book for you. Prerequisites include a good working knowledge of Microsoft Excel as well as knowledge of basic dashboard practices.

SAP BusinessObjects Dashboards is a leading Business Intelligence and reporting tool that provides you with a real-time understanding of your business with agile visualizations. Starting with an introduction to Dashboards and its benefits, the book slowly moves on to explain the dashboard creation process. After this, you will learn how to add charts, single-value components, maps, selectors, and other third-party plugins to the existing dashboards. Furthermore, it shares many best practices and will also help you to connect your dashboard to real data by establishing a data connection to a data source. You can also explore more about mobile BI and learn how to create dashboards for mobile devices. By the end of the book, you will be able to prepare, plan, and design interactive dashboards based on your business requirements using this cutting-edge BI tool.

THE DEFINITIVE, COMPREHENSIVE, OFFICIAL GUIDE TO XCELSIUS 2008 DASHBOARDS Using Xcelsius, you can create powerful, interactive dashboards, gather data from spreadsheets or databases, and deliver knowledge that can be instantly understood and acted upon. Now there's a definitive, authoritative guide to making the most of Xcelsius 2008, the newest version of this breakthrough product. Loren Abdulezer, editor-in-chief of Xcelsius Journal, shares insider's knowledge that goes far beyond any other book or online help resource. Abdulezer introduces Xcelsius 2008, reviews its core concepts, and demonstrates the wide range of dashboards it can create. After you know what's possible, you'll go deep inside Xcelsius, gaining hands-on experience with every feature you need to master. You'll learn how to quickly represent any data with charting components; use dials, gauges, and speedometers; incorporate multiple layers in your dashboards and visualizations; use Xcelsius to perform more useful analyses and manage more interactively; work with maps, demographics, and segmented data; create "smart data" and alerts; and much more. Abdulezer offers tips and tricks you won't find anywhere else. You'll learn how to work with data that isn't rock-solid—and even how to create your own custom components that go beyond Xcelsius's built-in features. Whether you're a business intelligence or database professional, power user, developer, or consultant, this book will help you create superior Xcelsius dashboards—and make better decisions. THE ONLY XCELSIUS 2008 DASHBOARDING BOOK YOU NEED Use Xcelsius 2008 to get better answers, identify emerging trends and opportunities, and manage more effectively Learn hands-on, through step-by-step examples using real business data Discover tips and tricks proven in real-world environments Deliver dashboard content in whatever format works best: as HTML pages, PowerPoint presentations, PDF files, or Word documents Fully leverage the information in your Excel spreadsheets—and go beyond Excel to use XML source data, too Implement Xcelsius best practices drawn from the hard-won knowledge of the entire global user community ON THE WEB Registered owners of the book can find all this and more online. All sample files used in the book Additional guides and tutorials to help you build dashboards Templates and example files for new dashboard interfaces
