Creating a template is as easy as setting up a document. The key difference is that a document is a one-time transaction and a template is a blueprint for repeatable transactions. With templates, you can add named persons, just as you do when creating a regular document.

This critical study examines the current state of broadcasting in Britain and attempts to describe the mood of broadcasters in the 1980s and the mood of the audiences they serve. A comparison is made between the operation of the UK's oldest and newest public television broadcasting systems.

This is the first book to provide a comprehensive survey of the use of new technologies in language learning. In order to explain how new technologies open up possibilities for language learning, numerous practical experiments made with various electronic media are analysed. They include the use of microcomputers, videotex (viewdata), teletext, video and videodiscs. In addition, artificial intelligence, synthetic speech, robots, distance education, language testing as well communicative training and the problem of accuracy and fluency are dealt with.

• New York Times bestseller
• The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world
" At this point in time, the Drawdown book is exactly what is needed: a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope. "
—Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming
" There 's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom. "
—David Roberts, Vox
" This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook. "
—Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA
In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth 's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Hands on Media History explores the whole range of hands on media history techniques for the first time, offering both practical guides and general perspectives. It covers both analogue and digital media: film, television, video, gaming, photography and recorded sound. Understanding media means understanding the technologies involved. The hands on history approach can open our minds to new perceptions of how media technologies work and how we work with them. Essays in this collection explore the difficult questions of reconstruction and historical memory, and the issues of equipment degradation and loss. Hands on Media History is concerned with both the professional and the amateur, the producers and the users, providing a new perspective on one of the modern era 's most urgent questions: what is the relationship between people and the technologies they use every day? Engaging and enlightening, this collection is a key reference for students and scholars of media studies, digital humanities, and for those interested in models of museum and research practice.

This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

In the three years to December 2012, the BBC gave 150 senior managers severance payments totalling £ 25 million. The BBC paid more salary in lieu of notice than it was obliged to in 22 of the 150 severance payments for senior managers in the three years to December 2012, at a cost of £ 1.4 million. It is unacceptable for the BBC, or any other public body, to give departing senior managers huge severance payments that far exceed their contractual entitlements. Some of the justifications put forward by the BBC were extraordinary. The Committee welcomes the changes that the BBC's Director General, Lord Hall, has made to cap severance pay. Recommendations include: the BBC should remind its staff that they are all individually responsible for protecting public money and challenging wasteful practices; to protect licence fee payers' interests and its own reputation, the BBC should establish internal procedures that provide clear central oversight and effective scrutiny of severance payments; the BBC Executive and the BBC Trust need to overhaul the way they conduct their business, and record and communicate decisions properly; the BBC Trust should be more willing to challenge practices and decisions where there is a risk that the interests of licence fee payers could be compromised; the BBC Trust and the BBC Executive need to ensure that decision-making is transparent and accountability taken seriously, based on a shared understanding of value for money, with tangible evidence of individuals taking public responsibility for their decisions.
