The top box represents the numerator, and you need to press the down arrow to access the denominator. If the key is not present, you need to just use the divide key. (Your calculator should have come with a manual that might point out a specific button for this function if you can't find the one I described.)

Manuals - Casio

A simple yet powerful calculator that includes standard, scientific, and programmer modes, as well as a unit converter. It's the perfect tool to add up a bill, convert measurements in a recipe or other project, or complete complex math, algebra, or geometry problems. Calculator history makes it easy to confirm if you've entered numbers correctly.

Taper functions describe a model of the actual geometric shape of a tree. When this shape is assumed to be known, volume by any log rule and to any merchantability standard can be calculated. PINEVOL is a computer program for calculating the volume of the major southern pines using species-specific bole taper functions. It can use the Doyle, Scribner, or International -inch log rules or calculate solid wood volume inside or outside of bark. This document describes the methods used in volume calculation in PINEVOL and is a program users guide.

This document incorporates two parts, an MRL Calculator User Guide and an MRL Calculator White Paper which discusses the methodology used in the User Guide.
