The only authorized Lab Manual for the Cisco Networking Academy CCNP Version 7 SWITCH course A CCNP certification equips students with the knowledge and skills needed to plan, implement, secure, maintain, and troubleshoot converged enterprise networks. The CCNP certification requires candidates to pass three 120-minute exams-ROUTE 300-101, SWITCH 300-115, TSHOOT 300-135-that validate the key competencies of network engineers. The Cisco Networking Academy curriculum consists of three experience-oriented courses that employ industry-relevant instructional approaches to prepare students for professional-level jobs: CCNP ROUTE: Implementing IP Routing, CCNP SWITCH: Implementing IP Switching, and CCNP TSHOOT: Maintaining and Troubleshooting IP Networks. This course teaches students how to implement, monitor, and maintain switching in converged enterprise campus networks. Students will learn how to plan, configure, and verify the implementation of complex enterprise switching solutions. The course also covers the secure integration of VLANs, WLANs, voice, and video into campus networks. Comprehensive labs emphasize hands-on learning and practice to reinforce configuration skills. The 15 comprehensive labs in this manual emphasize hands-on learning and practice to reinforce configuration skills.

The only authorized Lab Manual for Cisco Networking Academy's new course CCNP SWITCH: Implementing IP Switched Networks, V.6 (Exam 642-813) A portable, bound copy of all 19 CCNP V 6.x SWITCH Labs: convenient lightweight and friendly Allows students to review or walk through hands-on labs without a huge textbook or live Web connection Contains additional pages between labs for in-class note-taking Separate answer key available at Cisco Academy Connection and the

PearsonHigher.com Instructor Resource site This hands-on switching Lab Manual is the perfect companion for all Cisco Networking Academy students who are taking the new course CCNP SWITCH: Implementing IP Switched Networks (V. 6) as part of their CCNP preparation. It offers a portable, bound copy of all 19 CCNP V 6.x SWITCH network switching labs in a convenient, lightweight format that allows students to walk through key procedures and easily take notes without a large textbook or a live Internet connection. Working with these conveniently-formatted labs, students will gain practical experience and skills for planning, configuring, and verifying the implementation of complex enterprise switching solutions using Cisco's Campus Enterprise Architecture; and for securely integrating VLANs, WLANs, voice, and video into campus networks.

The only authorized Lab Manual for Cisco Networking Academy's newly-updated course CCNP ROUTE: Implementing IP Routing, V.6 (Exam 642-902) A portable, bound copy of all 32 CCNP V 6.x ROUTE Labs: convenient, lightweight and friendly Allows students to review or walk through hands-on labs without a huge textbook or live Web connection Contains additional pages between labs for in-class note-taking Separate answer key available at Cisco Academy Connection and the PearsonHigher.com Instructor Resource site This hands-on routing Lab Manual is the perfect companion for all Cisco Networking Academy students who are taking the new course CCNP ROUTE: Implementing IP Routing (V. 6) as part of their CCNP preparation. It offers a portable, bound copy of all 32 CCNP V 6.x ROUTE network routing labs in a convenient, lightweight format that allows students to walk through key procedures and easily take notes without a large textbook or a live Internet connection. Working with these conveniently-formatted labs, students will gain practical experience and skills for using advanced IP addressing and routing in implementing scalable and secure Cisco ISR routers connected to LANs and WANs; and for configuring secure routing solutions to support branch offices and mobile workers.

Gain necessary hands-on experience implementing CCNP Switching concepts with this practical lab guide Prepare for the CCNP Switching exam through hands-on application of concepts Lab configurations complete with explanations of equipment set-up and execution Valuable reference tool for Catalyst switches including short cuts, caveats, and application of the most advanced features Real-world scenarios representing the whole range of CCNP Switching topics CCNP Practical Studies: Switching (CCNP Self-Study) provides CCNP candidates with an in-depth, hands-on experience in configuring Cisco Catalyst switches. This practical guide shows intermediate level networkers how to apply the theoretical knowledge they have gained through CCNP Coursework and exam preparation. Configuration labs performed within this book will cover all technologies tested upon in Switching exam #640-604, as well as a number of real world scenarios that will test the users overall understanding of multilayer switching. The labs come complete with full explanations, highlighting why the chosen commands and techniques are recommended. In addition to applicable labs this book also provides some general information on various switching technologies to bridge gaps in the BCMSN course as well as tips, tricks, shortcuts, and caveats for deploying Cisco switching gear in production environments. This book also includes exercises (similar to traditional mathematics exercises) which will help readers internalize, practice, and memorize certain concepts and thought processes necessary to successfully deploying a switched network. Part of the Practical Studies series from the Cisco Press, this book provides self-study based hands-on experience. As such, it can be used in conjunction with other Cisco Press titles as well as being an excellent companion to instructor led training from a Cisco Learning Partner.

Routing and Switching Essentials Lab Manual The only authorized Lab Manual for the Cisco Networking Academy Routing and Switching Essentials course in the CCNA Routing and Switching curriculum Routing and Switching Essentials Lab Manual contains all the labs and class activities from the Cisco® Networking Academy course.
