The numerical analysis shows that the fractionally damped energy harvesting system exhibits chaos, periodic motion, chaos and periodic motion in turn when the fractional order changes from 0.2 to 1.5. The period doubling route to chaos and the inverse period doubling route from chaos to periodic motion can be clearly observed.

Abstract. The effect of nonsinusoidal forces on the onset of horseshoe chaos is studied both analytically and numerically in the fractionally damped Duffing-vander Pol (DVP) oscillator. The nonsinusoidal peri-odic forces considered are square-wave, symmetric saw-tooth wave, and asymmetric saw-tooth wave. An
