Chemistry Chapter 14

Section 14.1 Collision Theory: A Model for the Reaction

Process. Goals. To describe a model, called collision theory,

that helps us to visualize the process of many chemical

reactions. To use collision theory to explain why not all

collisions between possible reactants lead to products. To

use collision theory to explain why possible reactants must

collide with an energy equal to or above a certain amount to

have the possibility of reacting and forming products.
