seeks to explain the processes, actors and current history behind China's international relations, as well as offering an in-depth look at the key areas of China's modern global relations. Among the key issues are: The expansion of Chinese foreign policy from regional to international interests China's growing economic power in an era of global financial uncertainty Modern security challenges, including maritime security, counter-terrorism and protection of overseas economic interests The shifting power relationship with the United States, as well as with the European Union, Russia and Japan. China's engagement with a growing number of international and regional institutions and legal affairs The developing great power diplomacy of China New

Online Library Chinas Foreign Policy Who Makes

chapters address not only China's evolving foreign policy interests but also recent changes in the international system and the effects of China's domestic reforms. In response to current events, sections addressing Chinese trade, bilateral relations, and China's developing strategic interest in Russia and the Polar Regions have been extensively revised and updated. This book will be essential reading for students of Chinese foreign policy and Asian international relations, and highly recommended for students of diplomacy, international security and IR in general.

The People's Republic of China is now over fifty years old. Long considered an outsider, or a club of one, in international relations, China

Online Library Chinas Foreign Policy Who Makes

has recently become more active in international institutions. Is China becoming a responsible power in global and regional international relations? How accurate is the traditional perception of China? What factors may be motivating the changes in China's approach to international institutions and its perceptions of its own role in the world? There is no certainty that China is becoming a more responsible power, recent developments may be just another manifestation of realpolitik. *Power and Responsibility in Chinese Foreign Policy* provides a vital insight into these issues, analysing the critical issues in China's international relations— China's regional and global diplomatic and security problems, the changing role of the People's Liberation Army, human rights,

Online Library Chinas Foreign Policy Who Makes religions and democratic movements, and the concept of responsibility.

Power and Responsibility in Chinese Foreign Policy is an insightful and vital introduction to all sides of the current debate over China's international relations.

China's inexorable rise as a major world power is one of the defining features of the contemporary political landscape. But should we heed the warnings of a so-called 'China threat'? Is China set to become the next superpower? Or will its ambitions be tempered by economic and political realities both at home and abroad? In this insightful and balanced analysis, noted China expert Stuart Harris explores China's present foreign policy and its motivations, focusing in particular on the extent to which China

Online Library Chinas Foreign Policy Who Makes

will co-operate with the West in years to come. He considers what factors, international or domestic, will influence the foreign policies being shaped in Beijing, including how far the Chinese regime will adhere to existing global norms and the evolving international system. In contemplating this uncertain future, Harris assesses the considerable challenges and vulnerabilities likely to impact on Chinese foreign policy, leading it to be cautious and hesitant or assertive and aggressive on the international stage. Concise and authoritative, this book will be essential reading for anyone seeking a clearer understanding of the international relations of one of the world's most important powers.

Various domestic factors impact upon China's foreign policy making, such as

bureaucracy, academics, media and public opinion. This stimulating book examines their increasing influence and focuses in particular on China's policy towards the United States, exploring whether there has been an emergence of societal factors, independent of the Communist Party, that have begun to exert influence over the policy process. It also debates questions such as how it will affect the ability of the Chinese government to frame and implement its policy towards the US, and whether it has generated institutional arrangements in China for cooperation on issues such as trade, human rights and Taiwan. The book provides a better understanding of the role of societal forces in China's foreign policy making process.

There has been a discernable calibration of Chinese foreign policy since the ascension of Xi Jinping to the top leadership positions in China. The operative term here is adjustment rather than renovation because there has not been a fundamental transformation of Chinese foreign policy or "setting up of a new kitchen" in foreign affairs. Several continuities in Chinese diplomacy are still evident. The People's Republic of China (PRC) has not wavered from its overarching strategy of rising through peaceful development. The PRC is still an active participant and leader in, or shaper of, global and regional regimes even as it continues to push for reforms of the extant order, towards an arrangement which it thinks will be less unjust and more equitable. It seeks to better "link up with the

international track", perhaps even more so under Xi's stewardship. Yet amidst these continuities, it is clear that there have been some profound shifts in China's foreign policy. From the enunciation of strategic slogans such as the "Asian security concept" and "major country diplomacy with Chinese characteristics"; the creation of the China-led and initiated Asian Infrastructure Investment Bank; the pursuit of Xi's signature foreign policy initiative, the One Belt One Road; to a purportedly more assertive and resolute defense of China's maritime territorial interests in East Asia—examples of these foreign policy calibrations (both patent and subtle) abound. In short, this has not been a complete metamorphosis but there are real changes, with important repercussions for China and the

international system. The burning questions then are What, Where, How and Why: What are these key foreign policy adjustments? Where and how have these occurred in Chinese diplomacy? And what are the reasons or drivers that inform these changes? This book seeks to capture these changes. Featuring contributions from academics, think-tank intellectuals and policy practitioners, all engaged in the compelling business of China-watching, the book aims to shed more light on the calibrations that have animated China's diplomacy under Xi, a leader who by most accounts is considered the most powerful Chinese numero uno since Deng Xiaoping.

The concept of 'harmonious world' has become the basis for the new principles and goals of Chinese foreign

policy under the fourth generation leadership. The question remains, however, about the exact meanings of these principles and slogans, and their implications for Chinese foreign policy. This is the first edited volume that attempts to address this significant question, and its insightful contributions elucidates new dimensions of Chinese foreign policy and their implications for China's relations with the world.

The success of China's post-1978 reforms has provided it with significant resources to reshape its external environment. This book shows how China has leveraged this power from a neorealist perspective, projecting military and economic power to advance Chinese interests.

In this timely text, Denny Roy shows how the drive for security and power underlying Chinese foreign policy is reinforced by other important factors, including China's internal political struggles and unique, historically driven perceptions of international affairs. Providing a wide-ranging assessment of China's foreign policy, the author explores the PRC's relationships with key international organizations and countries, including the United States, Japan, Russia, Korea, India, and the Southeast Asian states.

This is the most comprehensive, in-depth account of how Chinese foreign and security policy is made and implemented during the reform era. It includes the contributions of more than a dozen scholars who undertook field

With new assertiveness and prominence, China under President Xi Jinping is rightly considered an emerging and aggressive superpower backed by growing economic and impressive military strength. In this meticulous and balanced assessment, Robert G. Sutter traces China's actions under Xi Jinping, including the many challenges they post to the international status quo. He provides a comprehensive analysis of newly prominent Chinese unconventional levers of power and influence in foreign affairs that were previously disguised, hidden, denied or otherwise neglected or unappreciated by specialists. Sutter considers the domestic issues that preoccupy Beijing
