This book is a printed edition of the Special Issue "Communication in Pharmacy Practice" that was published in Pharmacy

Interpersonal Communication in Pharmaceutical Care shows readers how to communicate better with patrons and patients in hospital and retail pharmacy locations. Author Helen Meldrum, who has been teaching interpersonal skills to pharmacy students and practitioners since the early 1980s, uses actual scenarios to demonstrate basic communication skills. These "real life" examples illustrate communication problems from the perspectives of pharmacy workers and their subsequent efforts to improve the lines of communication with patrons. Yet the case studies do more than depict actual dialogue between pharmacists and their customers and patients; they address improved communication between co-workers, a vital aspect of providing excellent pharmacy practice. Throughout Interpersonal Communication in Pharmaceutical Care, the reader finds how important it is to replace negative communication with more effective choices. These conversations prepare readers to act--not react--when faced with difficult persons or situations in pharmacy settings. Interpersonal Communication in Pharmaceutical Care is a resource of how to improve communication in pharmacy practice. Pharmacists who analyze the scenarios in this book can more readily identify effective responses to challenging situations in hospital and retail practice. The interpersonal skills section covers such fundamentals as: Basic speaking and listening skills Responsible assertive communication skills Counseling skills Interprofessional problem-solving skills Conflict management skills Collaborative communication skills Truly a unique book due to its practical nature, Interpersonal Communication in Pharmaceutical Care is appropriate for all pharmacy practitioners from the level of technician through supervisor. Because the cases featured are transcripts of actual interactions between pharmacists, customers, and co-workers, readers can identify with the situations and begin to effectively change their communication methods with satisfactory results--for the patron or patient and the pharmacist.

Fundamental Skills for Patient Care in Pharmacy Practice enables students and new pharmacists to master the skills associated with clinical care in either the inpatient or outpatient setting. In accessible steps, this valuable resource provides the tools for gaining medication histories from patients and counseling them on the most effective and safe manner to take medications. Each chapter explores the background and practice of a critical skill, tools that aid in its development and mastery, and tips for success. Students and pharmacists will come away with the knowledge to identify drug-related problems and formulate plans for solutions to these problems. Fundamental Skills for Patient Care in Pharmacy Practice prepares future pharmacists to communicate effectively in verbal and written formats with health professionals and special patient populations as they prepare and present SOAP notes, patient cases, and discharge

counseling.

Patient Communication for Pharmacy: A Case-Study Approach on Theory and Practice offers communication strategies to promote patient-centered care. Utilizing a case study approach, this practical guide develops readers' understanding of the unique communication dynamics between pharmacists and patients and assists them in strengthening the communication skills necessary for providing optimal patient outcomes. Focusing on skills acquisition and an integration of communication and behavioral change theories, this valuable resource also addresses issues relevant to pharmacist-patient communication and relationship building including: health literacy, culturally competent care, patient compliance, conflict/emotionally charged conversations, and more. The "Learn, Practice, Assess" Case Approach offers patient case activities at the end of each chapter designed to help readers strengthen communication skills through repetition and application of the material presented. Instructor Resources include a Test Bank, Slides in PowerPoint format, a Sample Syllabus, and Web Links to helpful communication video examples.

Covering the skills needed for pharmaceutical care in a patient-centered pharmacy setting, Clinical Skills for Pharmacists: A Patient-Focused Approach, 3rd Edition describes fundamental skills such as communication, physical assessment, and laboratory and diagnostic information, as well as patient case presentation, therapeutic planning, and monitoring of drug intake. Numerous case examples show how skills are applied in clinical situations. Now in full color, this edition adds more illustrations and new coverage on taking a medication history, physical assessment, biomarkers, and drug information. Expert author Karen J. Tietze provides unique, pharmacy-specific coverage that helps you prepare for the NAPLEX and feel confident during patient encounters. Coverage of clinical skills prepares you to be more involved with patients and for greater physical assessment and counselling responsibilities, with discussions of communication, taking a medical history, physical assessment, reviewing lab and diagnostic tests, and monitoring drug therapies. A logical organization promotes skill building, with the development of each new skill building upon prior skills. Learning objectives at the beginning of each chapter highlight important topics. Self-assessment questions at the end of each chapter help in measuring your comprehension of learning objectives. Professional codes of ethics are described in the Ethics in Pharmacy and Health Care chapter, including confidentiality, HIPAA, research ethics, ethics and the promotion of drugs, and the use of advance directives in end-of-life decisions. Numerous tables summarize key and routinely needed information. Downloadable, customizable forms on the companion Evolve website make it easier to perform tasks such as monitoring drug intake and for power of attorney.
