Contemporary China Society and Social Change

The author discusses the social structure, social stratification, social construction, and development of contemporary Chinese society. Arguing that the gap between economic and social development has become the major social issue facing modern China, the author advocates paying close attention to the country's social structure and the growth of the middle class.

Abstract. Food-safety problems constitute a new, urgent, and multifaceted challenge to Chinese people, society, and the state, involving a number of social, political, and ethical issues beyond those of food safety, nutrition, and health. In light of Ulrich Beck's theory of risk society, this article examines food-safety problems in contemporary Chinese society at the levels of food hygiene, unsafe food, and poisonous foods and argues that food-safety problems not only affect the lives of ...

considers China's imperial past, the social and institutional legacies of the Maoist era, and the momentous forces shaping it in the present. It also emphasises diversity and multiplicity, encouraging readers to consider new perspectives and rethink Western stereotypes about China and its people. Real-life case studies illustrate the key features of social relations and change in China. Definitions of key terms, discussion questions and lists of further reading help consolidate learning. Including full-colour maps and photographs, this book offers remarkable insight into Chinese society and social change.

Social Change in Contemporary China offers a wide-ranging examination of Chinese institutional change in areas of education, religion, health care, economics, labor, family, and local communities in the post-Mao era. Based on the pioneering work of sociologist C. K. Yang (1911–1999), and his institutional diffusion theory, the essays analyze and develop the theory as it applies to both public and private institutions. The interrelationship of these institutions composes what Yang termed the Chinese “system,” and affects nearly every aspect of life. Yang examined the influence of external factors on each institution, such as the influence of Westernization and Communism on family, and the impact of industrialization on rural markets. He also analyzed the impact of public opinion and past culture on institutions, therein revealing the circular nature of diffusion. Perhaps most significant are Yang's insights on the role of religion in Chinese society. Despite the common perception that China had no religion, he uncovers the influence of classical Confucianism as the basis for many ethical value systems, and follows its diffusion into state and kinship systems, as well as Taoism and Buddhism. Writing in the early years of Communism, Yang had little hard data with which to test his

theories. The contributors to this volume expand upon Yang's groundbreaking approach and apply the model of diffusion to a rapidly evolving contemporary China, providing a window into an increasingly modern Chinese society and its institutions.

This book is the third study done by the Research Group on Social Structure Change in Contemporary China, a group affiliated with the Institute of Sociology, Chinese Academy of Social Sciences. The group has focused on the process of development and change in contemporary Chinese social structure and come to the following conclusions. Contemporary China is transitioning from a traditional agricultural and rural society to a modern industrialized and urban society; from a highly centralized planned economy to a robust socialist market economic system. The entire society is undertaking an unprecedented evolution. During the three decades of reform and opening up, China has made brilliant achievements, never seen before in history. Now, China is in a critical period of reform and opening up, with very complex, far-reaching and closely intertwined social problems, which are also unprecedented. After deep and detailed analysis the Research Group believes that these problems cannot be resolved only by economic methods. In order to get to the roots of these social problems, China must develop new social policies, strengthen the social structure and carry out social system reform. The core purpose of the book is to recommend theories and methods on social structure to society and readers, and to investigate the development and change in China's social structure. We believe that social structure theory, a brand-new point of view to analyze the current situation, is capable of deciphering the social contradictions in China's development to some extent, as opposed to mere economic theory, which is

Get Free Contemporary China Society And Social Change

inadequate to fully address the structural problems in China.

This book adopts Durkheim's legal perspective to treat law as a symbol of social solidarities to examine Chinese society. The work analyzes changes in the nature of social solidarity from observing changes in laws, thus drawing together western socio-legal theory and distinctive Chinese conditions. It draws on Durkheim's theoretical framework and methodology to develop a more comprehensive understanding of the role of law using theories of others such as Habermas and by taking into account the discussion of power and the conflicts of interests in analyzing key social features during transition. The analysis of social anomie in terms of the changes of juridical rules as well as the changes in the nature of social solidarity provides an inspiring perspective to look into contemporary social problems. The book will be essential reading for researchers and academics working in the areas of socio-legal studies, legal theory and law and society in China.

Based on documentary materials including interviews with key players in China, this book charts the development of non-governmental and non-profit organizations in China from the late 1970s to the present day. It recounts how in the aftermath of the 1978 reforms that created a market economy and diversified interests and social life, new institutions and organizations outside of the state system increased dramatically in number, size and influence. These organizations, which barely existed before the reforms began in the late 1970s, carry out many social, economic and cultural tasks neglected by the government. Qiusa Ma examines two key questions crucial to understanding the development of NGOs in China: First, is it possible

Get Free Contemporary China Society And Social Change

under China's one-party state for non-governmental organizations to thrive and play important economic, social and political functions? And secondly, are NGOs facilitating the formation of a civil society in China?

This analytic overview of contemporary Chinese politics focuses on six major themes: agriculture, urban life and industry, law and policing, intellectuals, women and the family, and minority nationalities.

Choice Outstanding Academic Title for 2015 More than three decades of economic growth have led to significant social change in the People's Republic of China. This timely book examines the emerging structures of class and social stratification: how they are interpreted and managed by the Chinese Communist Party, and how they are understood and lived by people themselves. David Goodman details the emergence of a dominant class based on political power and wealth that has emerged from the institutions of the Party-state; a well-established middle class that is closely associated with the Party-state and a not-so-well-established entrepreneurial middle class; and several different subordinate classes in both the rural and urban areas. In doing so, he considers several critical issues: the extent to which the social basis of the Chinese political system has changed and the likely consequences; the impact of change on the old working class that was the socio-political mainstay of state socialism before the 1980s; the extent to which the migrant workers on whom much of the economic power of the PRC since the early 1980s has been based are becoming a new working class; and the consequences of China's growing middle class, especially for politics.

The result is an invaluable guide for students and non-specialists interested in the contours of ongoing social change in China.

What is the social structure of Chinese society in the 21st century? How should China address the problem of migrant workers? How can China form a modern society? These key sociological issues are some of the topics this book covers. This book is a collection of the research articles and lectures that Dr. Lu Xueyi, the former Head of the Institute of Sociology at the Chinese Academy of Social Sciences, has published since the 1980s. The author discusses the social structure, social stratification, social construction, and development of contemporary Chinese society. Arguing that the gap between economic and social development has become the major social issue facing modern China, the author advocates paying close attention to the country's social structure and the growth of the middle class. The book will be of interest to all scholars and students of Sociology and Chinese Studies.

"Before 1978, China was backward economically, politically, diplomatically and was extremely isolated. The country had a few diplomatic allies like North Korea, Russia and Vietnam. However, in the past three decades, the country has witnessed robust changes that have aroused the interest of the westerners in knowing more about the country. This book provides first-hand information on China's social changes and economic transformation. It enables readers to understand the Chinese Society vividly, dynamically, and practically. It examines various facets of the Chinese society ranging from famous landmarks, popular customs, festivals, food, daily chores, etc. The book also offers tips for those who are willing to live, work

and run a business in China."--

This book is a direct and empirical response to the mounting official interest in citizenship education, increasing dynamics between state and society, and growing citizenship awareness and practice in society in contemporary China. Placing the focus on society, the book investigates the meaning of the Chinese term gongmin – equivalent to ‘citizen’ – in non-official media discourses and in university students’ and migrant workers’ perceptions, through the constructed analytical lens of Western citizenship conception. By laying out the complex details of how the meaning of the term resembles and deviates in and between collective social discourses and individual citizens’ understandings with reference to state discourses, the book makes clear that there is discrepancy in the meaning of gongmin between state and society and that the meaning varies in contemporary Chinese society. Cutting across multiple topics, this book is a valuable resource for students and researchers interested in Chinese citizenship, East-West citizenship, citizenship education, the media, university students and migrant workers in China.
