The second, "Deeper Illusions" was better in many ways. The conversations between the characters was more grownup (I felt the conversations were between teenagers in the first book), and the plot was much better. The story seemed more sewed at the seams and I must admit that I gasped at the plot twists and even cried at some points in the story.

Annie currently lives in San Diego with her two fur-babies, Bella and Toby, and her significant other, Joey. When she's not writing, she's busy reading, cycling all over town, watching cooking shows or classic old movies on TCM (Cary Grant is her favorite) and occasionally watching trashy television shows.

Attorney Iris Snowe drinks too much, eats too much, and spends too much. Her love life has been as spectacularly unsuccessful as her law practice, so she spends her evenings in her tiny apartment watching bad TV and talking to her cat. A one-night stand with a gorgeous stranger changes the trajectory of her life. Ryan Gallagher not only looks like a Ralph Lauren model, but is extraordinarily wealthy. In other words, stratospheres out of Iris' league. What happens next is that Iris embarks upon the Cinderella affair of her life, with a man who truly loves her. But the fairy tale is fractured, as the affair is marred by obsession, jealousy, and dark secrets that Ryan has desperately sought to conceal and repress. And one of those secrets just might be deadly...

Nick O'Hara is, for lack of a better word, a man-wh***. Look in the Urban Dictionary under that word, and his name will no doubt be mentioned. The only qualifications that he looks for in a bed-mate is that the person is hot and breathing. Mainly hot. He has no desire for an emotional connection with another person, and that's the way he lives his life. He has his fabulous wealth and his reputation as a premiere architect, and that's enough for him. Until Scotty James. Scotty is a graduate student at Columbia University in New York City. She's broken from traumatic experiences from her years in foster care and homelessness. She has a vulnerability that is intoxicating to Nick, because, deep down, he knows that he is as broken as she. When Nick pursues Scotty, it seems that she is the only woman who doesn't want to be with him. At first she's a challenge, but Nick soon finds himself falling in love for the first time in his life. With a woman who wants nothing to do with him. Can Scotty overcome her trust issues and fear to let Nick in? Or will she prove to be too broken to trust? This is a full-length, 95,000 word, New Adult

novel with mature themes.

Beautiful empath Serena Roberts is hired to represent Slade Bridgewell, a notorious man-whore billionaire who is accused of a brutal murder. His pull is irresistible, magnetic and dangerous. He tells Serena that anybody is capable of murder under the right circumstances. As Serena is pulled ever closer into his web, she's never quite sure if he truly is the killer. That doesn't stop her from starting a torrid and sadistic affair that could ruin her. Anybody is capable of murder. Even Slade.

John Gardner's most poignant novel of improbable love. At the heart of John Gardner's "Nickel Mountain" is an uncommon love story: when at 42, the obese, anxious and gentle Henry Soames marries seventeen-year-old Callie Wells--who is pregnant with the child of a local boy--it is much more than years which define the gulf between them. But the beauty of this novel is the gradual revelation of the bond that develops as this unlikely couple experiences courtship and marriage, the birth of a son, isolation, forgiveness, work, and death in a small Catskill community in the 1950s. The plot turns on tragic events--they might be accidents or they might be acts of will--involving a cast of rural eccentrics that includes a lonely amputee veteran, a religious hysteric (thought by some to be the devil himself) and an itinerant "Goat Lady." Questions of guilt, innocence, and even murder are eclipsed by deeds of compassion, humility, and redemption, and ultimately by Henry Soames' quiet discovery of grace. Novelist William H. Gass, a friend and colleague of the author, has written an introduction that shines new light on the work and career of the much praised but often misunderstood John Gardner.

This study of nationalism in Eastern Europe and the former Soviet Union develops an original account of the interlocking and opposed nationalisms of national minorities, the nationalizing states in which they live, and the external national homelands to which they are linked by external ties.

From 2020 Democratic presidential candidate Andrew Yang, a captivating account of how "a skinny Asian kid from upstate" became a successful entrepreneur, only to find a new mission: calling attention to the urgent steps America must take, including Universal Basic Income, to stabilize our economy amid rapid technological change and automation. The shift toward automation is about to create a tsunami of unemployment. Not in the distant future--now. One recent estimate predicts 45 million American workers will lose their jobs within the next twelve years--jobs that won't be replaced. In a future marked by restlessness and chronic unemployment, what will happen to American society? In *The War on Normal People*, Andrew Yang paints a dire portrait of the American economy. Rapidly advancing technologies like artificial intelligence, robotics and automation software are making millions of Americans' livelihoods irrelevant. The consequences of these trends are already being felt across our communities in the form of political unrest, drug use, and other social ills. The future looks dire-but is it unavoidable? In *The War on Normal People*, Yang imagines a different future--one in which having a job is distinct from the capacity to prosper and seek fulfillment. At this vision's core is Universal Basic Income, the concept of providing all citizens with a guaranteed income-and one that is rapidly gaining popularity among forward-thinking politicians and economists. Yang proposes that UBI is an essential step toward a new, more durable kind of economy, one he calls "human capitalism."

Universal basic income. A 15-hour workweek. Open borders. Does it sound too good to be true? One of Europe's leading young thinkers shows how we can build an ideal world today. "A more politically radical Malcolm Gladwell." --New York Times After working all day at jobs we often dislike, we buy things we don't need. Rutger Bregman, a Dutch historian, reminds us it needn't be this way-and in some places it isn't. Rutger Bregman's TED Talk about universal basic income seemed impossibly radical when he delivered it in 2014. A quarter of a million views later, the subject of that video is being seriously considered by leading economists and government leaders the world over. It's just one of the many utopian ideas that Bregman proves is possible today. *Utopia for Realists* is one of those rare books that takes you by surprise and challenges what you think can happen. From a Canadian city that once completely eradicated poverty, to Richard Nixon's near implementation of a basic income for millions of Americans, Bregman takes us on a journey through history, and beyond the traditional left-right divides, as he champions ideas whose time have come. Every progressive milestone of civilization--from the end of slavery to the beginning of democracy--was once considered a utopian fantasy. Bregman's book, both challenging and bracing, demonstrates that new utopian ideas, like the elimination of poverty and the creation of the fifteen-hour workweek, can become a reality in our lifetime. Being unrealistic and unreasonable can in fact make the impossible inevitable, and it is the only way to build the ideal world.

Sir Norman Angell, pioneer both of international relations as a distinct discipline and of the theory of globalization, winner of the Nobel Peace Prize, and one of the twentieth century's leading internationalist campaigners on both sides of the Atlantic, lived the great illusion in three senses. First, his 'life job', as he came to call it, was founded upon and defined by *The Great Illusion*, a best-seller whose original version appeared in 1909: it perceptively showed how economic interdependence would prevent great powers profiting from war; yet it made other, less felicitous, claims from whose implications he spent decades trying to extricate himself. Second, his magnum opus and all his best work derived, to an extent unusual for a public intellectual, not from abstract thinking but from an eventful and varied life as a jobbing journalist in four countries, a cowboy, land-speculator, and gold-pro prospector in California, production manager of the continental edition of the *Daily Mail*, author, lecturer, pig farmer, Labour MP, entrepreneur, and campaigner for collective security. Third, he fostered many an enduring illusion about himself by at various times giving wrongly his age, name, nationality, marital status, key career dates, and core beliefs. By dint of careful detective work, this first biography of Angell reveals the truth about a remarkable life that has hitherto been much misrepresented and misinterpreted.
