Design And Construction Of Urban Urban design is not architecture, it is not planning, rather it is somewhere between the two. It links the design and typology of buildings to the strategic scale of planning, and as such it has elements of both: design and planning, at the scale of the region, the city, the neighbourhood, the block and the building itself.

Design and Construction of Urban Stormwater Management ...

Urban design is about making connections between people and places, movement and urban form, nature and the built fabric. Urban design draws together the many strands of place-making, environmental stewardship, social equity and economic viability into the creation of places with distinct beauty and identity. Urban design draws these and other strands together, creating a vision for an area and then
