Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

Research Paper (postgraduate) from the year 2014 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: A, Atlantic International University (School of Business and Economics), course: Ph.D. Economics, language: English, abstract: Electronic banking (e-banking) has brought about a revolution in the functioning of banks as it offers major opportunities to banks and their customers. This has made the transition to electronic banking a necessity for banks in order to be viable. Despite its benefits, developing countries still lag behind in the adoption of electronic banking. This study therefore seeks to examine the adoption of e-banking in the Ghanaian banking industry with Guaranty Trust Bank Ghana Limited (GTBank) as the case study to identify the benefits, challenges and critical success factors for the adoption of e-banking in the Ghanaian banking industry. The research made use of questionnaires and interviews to collect data from staff and customers of GTBank. The results of the study indicated that e-banking adoption was a business strategy taken by the bank in response to customer needs and the changing marketing trends in the banking industry. The benefits, challenges and critical success factors of e-banking are also identified and discussed. From the study it is obvious that tremendous benefits such as revenue generation, improvement in productivity and efficiency in service delivery and cost savings were derived from e-banking. The lack of a solid technology infrastructure was identified as a major challenge of e-banking adoption in the country. The study however revealed that there is a promising future for e-banking in Ghana. Some recommendations to enhance the adoption of e banking in country are made based on this study.

Newly revised and updated, this is the industry standard for executives and professionals in all major industries, and includes a free resume review by the author. This book empowers readers to know the thought-provoking field of software effort estimation. It discusses how requirement change effort estimation using algorithmic and impact analysis techniques is used to optimize the estimation accuracy prediction of software development effort. It is a worthy read for researchers and practitioners to estimate the change effort required to develop traditional and agile-based software systems.

Electronic banking (E-banking) is a generic term encompassing internet banking, telephone banking, mobile banking etc. Several initiatives taken by the Government of India as well as the Reserve Bank of India (RBI) have facilitated the development of E-banking in India. The Government of India enacted the IT Act, 2000 with effect from October 17, 2000, which provides legal recognition to electronic transactions and other means of electronic commerce. The existing regulatory framework over banks has also been extended to E-banking. It covers various issues that fall within the framework of technology, security standards and legal and regulatory issues. This book contains 12 articles by scholars specialising in the area of banking.

This new edition of a core undergraduate textbook for construction managers reflects current best practice, topical industry preoccupations and latest developments in courses and fundamental subjects for students. While the construction process still requires traditional skills, changes over recent decades today demand improved understanding of modern business, production and contractual practices. The authors have responded accordingly and the book has undergone a thorough re-write, eliminating some of the older material and adding new processes now considered essential to achieving lean construction. Particular emphasis is given, for example, to supply chains and networks, value and risk management, BIM, ICT, project arrangements, corporate social responsibility, training, health and welfare and environmental sustainability. Modern Construction Management presents construction as socially responsible, innovative, carbon-reducing, manager-involved, people-orientated, crisis-free industry that is efficient and cost effective. The overall themes for the Seventh Edition are: Drivers for efficiency: lean construction underpinning production management and off-site production methods. Sustainability: reflecting the transition to a low carbon economy. Corporate Social Responsibility: embracing health & safety, modernistic contracts, effective procurement, and employment issues. Building Information Management: directed toward the improvement of construction management systems. The comprehensive selection of worked examples, based on real and practical situations in construction management and methods will help to consolidate learning. A companion website at <http://www.wiley.com/go/MCM7> offers invaluable support material for both tutors and students: Solutions to the self-learning exercises PowerPoint slides with discussion topics Journal and web references Structured to reflect site, business and corporate responsibilities of managers in construction, the book continues to provide strong coverage of the salient elements required for developing and equipping the modern construction manager with the competencies and skills for both technical and business related areas.

"This collection of essays brings together papers that were presented at the sixth biennial conference of Advances in Social and Economic Aspects of Technology (ASEAT) ... in Manchester between 7th and 9th April 2003"--Introd.

Details the key impacts and risk assessment within the context of technology-enabled information (TEI). This volume is designed as a secondary text for graduate students, and also for a professional audience of researchers and practitioners in industry.
