The following BMW E36 M3 oil change information is based on the US spec S50B30 and S52B32 engines. The S50B30 was only used for the 1995 year model in the US, the first year the E36 M3 was made available to the US market. 1996 through 1999 E36 M3 models used the S52B32 engines. How do I know when my E36 M3 needs an oil change?

BMW E36 M3 OIL CHANGE INFORMATION - BIMMERTips.com

E36 M3s produced up to early 1999 came with BMW's Mineral Based Dino 15W-40 engine oil, while those produced at the end of 1999 came with the company's Longlife 5W-40 (synthetic). Taking this into account, it is generally recommended that you use a good quality 0W-40 or 5W-40 (most recommended) engine oil.

Best Engine Oil & Oil Filter for a BMW E36 M3 - Garage Dreams

Bmw M3 Wikipedia. Can i get some opinions on what oil weight to use for the e36 m3, s52 engine? Oil weight can play a big part of the amount of oil you may be consuming. I was using the incorrect weight of oil (10w30) after the car. Yes this was the vanos making noise and more than likely the chain tensioners as well. Bmw recommends 10w60, but ...

E36 M3 Oil Weight | Design Corral

The E30 cars require between 3.5 - 4.2 quarts, and the E36 cars require 5 quarts for the four-cylinder cars, and 6.0-6.5 for the six cylinder cars. You'll also need a 17mm or 19mm wrench to remove the drain plug from the bottom of the engine sump. Start by driving the car around, and letting it heat up to operating temperature.

Engine Oil Info for BMW - BMW Performance & BMW Parts

The BMW E36 is the third generation of the BMW 3 Series range of compact executive cars, and was produced from 1990 to 2000. The initial models were of the four-door sedan body style, followed by the coupe, convertible, wagon and hatchback body styles in later years. The E36 was the first 3 Series to be offered in a hatchback body style. It was also the first 3 Series to be available with a six-speed manual transmission, a five-speed automatic transmission and a four-cylinder diesel engine. The

The BMW E36 oil separator valve, also known as the positive crankcase ventilation (PCV) valve, is a common cause of poorly performing engines in 1990-1998 3 series cars. Its sole purpose is to relieve the pressure that builds up inside your engine's crankcase by sucking out the gase, oil and water condensation produced during engine operation.
