FUCHS ECOCUT and PLANTOCUT neat metalworking fluids are formulated in line with the very latest findings. FUCHS supports its customers with far-reaching research and development activities and by directly including expertise from practical trials in new neat cutting fluids.

ECOCOOOL-ECOCUT-FUCHS
FUCHS Metal Cutting Lubricants – Ecocool & Ecocut. 14.10.2020 - 12:46 . The term cutting fluid describes a medium whose principal functions during machining are cooling and lubrication. The primary objectives are to reduce friction between the tool and the material being machined as well as dissipating any thus created heat. Another role of the cutting fluid is to flush any chips or swarf ...

Provides current and comprehensive information on more than 24,000 of Europe's largest companies, including the names of 194,000 senior executives. Entries typically include company name; address; telephone and fax numbers; e-mail and Web addresses; names of senior management and board members; description of business activities; brand names and trademarks; subsidiaries and affiliates; number of employees; financial information for the last two years; principal shareholders; and private/public status.

This authoritative directory has been expanded to cover 13,000 major companies and includes the contact names of more than 81,000 senior executives. major companies and includes the contact names of more than 81,000 senior executives. Entries typically include company name; address; telephone and fax numbers; e-mail and Web addresses; names of senior management and board members; description of business activities; brand names and trademarks; subsidiaries and affiliates; number of employees; financial information for the last two years; principal shareholders; and private/public status.

Described as "Who owns whom, the family tree of every major corporation in America," the directory is indexed by name (parent and subsidiary), geographic location, Standard Industrial Classification (SIC) Code, and corporate responsibility.

The book presents a systematic and efficient method to design high quality / reliability and high performance products / processes at low cost. Contains case studies from diverse engineering fields to describe Robust Design / Taguchi method. Some topics covered are: orthogonal arrays, Signal-to-Noise ratios as design quality metric, computer-aided robust design techniques, and more.
