Academy of Allied Health Career Electronic Health Records Specialist program is authorized by The Tennessee Higher Education Commission (THEC). This authorization has to be renewed each year and is based on an evaluation by minimum standards concerning quality of education, ethical business practices, health and safety, and fiscal responsibility.

Technology is changing the qualifications required to perform both clinical and administrative allied health duties. Students entering the job market today must be familiar with the ways in which technology is used to perform on-the-job tasks. In particular, the understanding of electronic health records is essential. This text integrates the presentation of concepts with the opportunity to gain hands-on experience working with a simulated EHR software, Practice Partner. The subject matter is presented in a logical order, proceeding from introductory material to coverage of specific features and functions of EHRs. After describing the need for EHRs, the text explains the basic purpose and content of an EHR system. With that knowledge in place, the subject moves to the topic of the information technology used in EHR systems. The need to ensure the privacy and security of the information in an EHR is emphasized.

Technology is changing the qualifications required to perform both clinical and administrative allied health duties. Students entering the job market today must be familiar with the ways in which technology is used to perform on-the-job tasks. In particular, the understanding of electronic health records is essential. This text integrates the presentation of concepts with the opportunity to gain hands-on experience working with an EHR software package. The subject matter is presented in a logical order, proceeding from introductory material to coverage of specific features and functions of EHRs. After describing the need for EHRs, the text explains the basic purpose and content of an EHR system. With that knowledge in place, the subject moves to the topic of the information technology used in EHR systems. The need to ensure the privacy and security of the information in an EHR is emphasized.

Never HIGHLIGHT a Book Again! Virtually all of the testable terms, concepts, persons, places, and events from the textbook are included. Cram101 Just the FACTS101 studyguides give all of the outlines, highlights, notes, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanys: 9780077423698 .

This up-to-date, accurate, and approachable text teaches students about electronic health records across a variety of delivery systems, making it ideal for all allied health students, regardless of their career focus. To meet the needs of different types of learners, the text includes a wealth of images; figures; video tutorials of simulation activities; and hands-on exercises such as presentations, Web research, and more. Student Benefits Covers core content to prepare students for RHIT exams. Includes a chapter on Personal Health Records, a topic of increasing importance in health-care education. Integrates soft skills and professionalism to prepare students for the workplace. Features a student-friendly, approachable writing style that meets students at their level to help them comprehend material. Instructor Benefits Provides many assessment opportunities, including: Chapter Checkpoints to test recall. End-of-chapter exercises to assess objective learning and critical thinking. Software activities that are reported to the instructor. Each textbook includes access to the Course Navigator and its live EHR Navigator system! About the Course Navigator This Web-based learning management system enhances students' understanding of core content through flashcards, live assessments, quizzes, 50 EHR tutorials, and a revolutionary EHR Navigator system. The Course Navigator also allows instructors to assess students' work, track progress, download results, and view upcoming events. About the EHR Navigator Based on the best features of many industry EHR systems, this live, Web-based application gives students realistic practice using an EHR system. It teaches students the principles of EHR software through a variety of inpatient, outpatient, and PHR. activities, developing students' skills and preparing them to be market-ready the moment they graduate. The EHR Navigator: Replicates the professional practice to prepare students for the workplace. Provides experience in all areas of EHRs--from adding and scheduling patient appointments, to adding clinical data to patient charts, to coding, to ePrescribing. Offers students as much practice as they desire in a format that is easy-to-navigate, colorful, and user-friendly. Includes software activities that are graded and reported to the instructor.
