Action Analysis is one
of the fundamental
principles of animation
that underpins all types
of animation: 2d, 3d,

Online Library Eric Goldbergs

computer animation, stop motion, etc. This is a fundamental skill that all animators need to create polished, believable animation. An example of Action Analysis would be Shrek's swagger in the film, Shrek. The animators clearly understood (through action analysis) the type of walk achieved by a

large and heavy individual (the real) and then applied their observations to the animated character of an ogre (the fantastic). It is action analysis that enabled the animation team to visually translate a real life situation into an ogre's walk, achieving such fantastic results. Key animation skills are

and exacting art form
which breathes life into
inanimate drawings, the
author covers every
aspect of the process.

"Drawn to life is a two
volume collection of the
legendary lectures from
long-time Disney
