Examines how quantum theory explains that the cosmos arises from consciousness • Reveals the unanimity between Schwaller de Lubicz ' s “ sacred science ” and the science of a cosmos governed by quantum mechanics Since the dawn of the Age of Science humankind has been engaged in a methodical quest to understand the cosmos. With the development of quantum mechanics, the notion that everything is solid matter is being replaced with the idea that information or “ thought ” may be the true source of physical reality. Such scientific inquiry has led to a growing interest in the brain ' s unique and mysterious ability to create perception, possibly through quantum interactions. Consciousness is now being considered as much a fundamental part of reality as the three dimensions we are so familiar with. Although this direction in scientific thought is seen as a new approach, the secret wisdom of the ancients presented just such a view thousands of years ago. Building on René A. Schwaller de Lubicz ' s systematic study of Luxor ' s Temple of Amun-Mut-Khonsu during the 1940s and ' 50s, Edward Malkowski shows that the ancient Egyptians' worldview was not based on superstition or the invention of myth but was the result of direct observation using critical faculties attuned to the quantum manifestation of the universe. This understanding of reality as a product of human consciousness provided the inspiration for the sacred science of the ancients--precisely the philosophy modern science is embracing today. In the philosophical tradition of Schwaller de Lubicz, *The Spiritual Technology of Ancient Egypt* investigates the technical and religious legacy of ancient Egypt to reveal its congruence with today ' s “ New Science. ”

Egypt in remarkable detail, exploring the dimensions of the language, cosmology, and temple life to show that a sacred mandate--the transformation of the human condition into its original cosmic substance--formed the foundation of Egypt's endeavors and still has great relevance today.

R. A. Schwaller de Lubicz (1887-1961), one of the most important Egyptologists of this century, links the sacred science of the Ancients to its rediscovery in our own time. Sacred Science represents the first major breakthrough in understanding ancient Egypt and identifies Egypt, not Greece, as the cradle of Western thought, theology, and science.

In *Ancient Egypt and Modern Psychotherapy*, Todd Hayen explores what the spiritual concepts of the enigmatic ancient Egyptians can teach us about our own modern psyches and the pursuit of a meaningful life. Hayen examines the ancient Egyptians ' possession of a concept contemporary academics have labeled "consciousness of the heart": an innate knowledge of the entirety of the universe. While all human beings possess this consciousness of the heart, our modern culture has largely lost the ability to tap into this inborn knowledge. By examining the material accomplishments of ancient Egypt, and how their seemingly deeper awareness of their inner world created a harmonious outer world, we can begin to understand how modern psychotherapy, through a Jungian perspective, could be instrumental in achieving a more profound and meaningful personal experience of life. *Ancient Egypt and Modern Psychotherapy* will be insightful reading for analytical psychologists in practice and in training, Jungian psychotherapists and psychologists, and academics and students of Jungian and post-Jungian studies and ancient spirituality.
