A useful handbook, this text presents guidelines frequently followed by writers of reports of empirical research designed for publication in scientific business journals. The guidelines describe the types of information that should be included, how this information should be expressed, and where various types of information should be placed within a report. Excerpts from journal articles are used to illustrate most of the guidelines. At the end of each chapter, there are questions for classroom discussion.

of prosperous and passionate family business entrepreneurs is indispensable. In order to help the families in business to better understand how to succeed with their enterprises we need qualified and updated research. This book is the answer! Hans-Jacob Bonnier, Bonnier Business Press Group, Sweden and 6th Generation Chairman of the Family Business Network International This Handbook is a unique compilation of the most important and the best recent family business research. The field has grown so rapidly that this effort will be a mark for the research to follow. The Handbook of Research on Family Business will be the reference for scholars in family business for many years to come. It will also stimulate new ideas in research. John L. Ward, IMD, Switzerland and Northwestern University, US The Handbook of Research on Family Business provides a comprehensive first port of call for those wishing to survey progress in the theory and practice of family business research. In response to the extensive growth of family business as a topic of academic inquiry, the principal objective of the Handbook is to provide an authoritative and scholarly overview of current thinking in this multidisciplinary field. The contributors examine recent advances in the study of family business, which has undertaken significant strides in terms of theory building, empirical rigour, development of sophisticated survey instruments, systematic measurement of family business activity, use of alternative research methodologies and deployment of robust tools of analysis. A wide selection of empirical studies addressing the current family business research agenda are presented, and issues and topics explored include: validation of the protagonist role that family firms play in social-economic spheres; operational and definitional issues surrounding what constitutes a family business; historical development of the field of family business; methodologies encompassing micro and macro perspectives; challenges to the orthodox

microeconomic view of homo-economicus firms by highlighting the virtues of family influence and social capital. Comprising contributions from leading researchers credited with shaping the family business agenda, this Handbook will prove an invaluable reference tool for students, researchers, academics and practitioners involved with the family business arena.

This book introduces students to major research processes and methods used in business research. The research process includes all steps in the research project beginning from the problem formulation, through research design, proposal, conducting the research, deriving conclusions, writing research report, and preparing and making presentation. The major research methods include risk assessment, statistics, sampling, hypothesis testing, surveys, and comparative analysis. It helps students develop solid knowledge and practical skills sufficient for conducting a research project from its initiation, through completion, and delivery. The author provides multiple examples as well as the questions and problems for self-testing and self-evaluation in each chapter. The book is structured to provide a smooth flow of understanding and learning the material along the learning curve and is concise enough to fit a one-semester course.
