Recipient of the 2017 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA) Chronologically organized, *Lifespan Development: Lives in Context* offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan.

Revised edition of the author's *Exploring lifespan development*, 2014.

Lifespan Development is the first textbook on this topic to be targeted to the high school student. In it, students learn about the different stages of development that people pass through as they age. From newborn to older adulthood, people continue to develop and change physically, cognitively, socially, and emotionally. Features covering cultural diversity, health, and safety are included throughout the text. Core Skills activities reinforce writing, speaking, math, and career readiness skills. The developmental theories of Erikson, Piaget, Vygotsky, and Kohlberg are highlighted. A unit is dedicated to career paths in education and training and human services. Case studies are included in every chapter to help students relate classroom learning to the real world. "

ESSENTIALS OF HUMAN DEVELOPMENT: A LIFE-SPAN VIEW, 2nd Edition fills the need for a shorter text that emphasizes the essential, defining features of modern research and theory in human development. Using a modified chronological approach and emphasizing the biopsychosocial framework, the text provides: a readable account of human development across the life span; conceptual foundations that enable students to become critical interpreters of developmental information; and an introduction to relevant research and its application to key issues. The text also emphasizes the application of human development research across diverse professional settings, making it ideal for students who are pursuing a career related to psychology or areas such as education, health, and human sciences. Succinct and filled with real-life examples, this text will capture your students' interest while introducing them to the essential issues, forces, and outcomes that make us who we are. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Balanced coverage of the entire life span is just one thing that distinguishes *HUMAN DEVELOPMENT: A LIFE-SPAN VIEW*, Seventh Edition. With its comprehensive, succinct, and applied coverage, the text has proven its ability to capture students' interest while introducing them to the issues, forces, and outcomes that make us who we are. Robert V. Kail's expertise in childhood and adolescence, combined with John C. Cavanaugh's extensive research in gerontology, result in a book with a rich description of all life-span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a benefit given the enormous amount of information covered in the course. The authors provide theoretical and empirical foundations that enable students to become educated, critical interpreters of developmental information. A blend of basic and applied research, as well as coverage of controversial topics and emergent trends, demonstrates connections between the laboratory and life. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
