'Exploring Science' has evolved to meet the advancing needs of today's science lessons. The student's book is now combined with a CD-ROM. The CD-ROM contains an ActiveBook (a digital version of the student book), fully blended with an extensive range of interactive multimedia resources.

Primary Exploring Science Teacher Guides provide comprehensive support for teachers and teaching assistants, saving you time and giving you a helping hand with planning.

A candid, feminist, and personal deep dive into the science and culture of pregnancy and motherhood Like most first-time mothers, Angela Garbes was filled with questions when she became pregnant. What exactly is a placenta and how does it function? How does a body go into labor? Why is breast best? Is wine totally off-limits? But as she soon discovered, it's not easy to find satisfying answers. Your obstetrician will cautiously quote statistics; online sources will scare you with conflicting and often inaccurate data; and even the most trusted books will offer information with a heavy dose of judgment. To educate herself, the food and culture writer embarked on an intensive journey of exploration, diving into the scientific mysteries and cultural attitudes that surround motherhood to find answers to questions that had only previously been given in the form of advice about what women ought to do—rather than allowing them the freedom to choose the right path for themselves. In *Like a Mother*, Garbes offers a rigorously researched and compelling look at the physiology, biology, and psychology of pregnancy and motherhood, informed by in-depth reportage and personal experience. With the curiosity of a journalist, the perspective of a feminist, and the intimacy and urgency of a mother, she explores the emerging science behind the pressing questions women have about everything from

miscarriage to complicated labors to postpartum changes. The result is a visceral, full-frontal look at what's really happening during those nine life-altering months, and why women deserve access to better care, support, and information. Infused with humor and born out of awe, appreciation, and understanding of the female body and its strength, *Like a Mother* debunks common myths and dated assumptions, offering guidance and camaraderie to women navigating one of the biggest and most profound changes in their lives.

Winner of the Pfizer Award from the History of Science Society  
"Contrary to legend, Ivan Pavlov (1849-1936) never trained a dog to salivate to the sound of a bell." So begins this definitive, deeply researched biography of Ivan Pavlov. Daniel P. Todes fundamentally reinterprets the Russian physiologist's famous research on conditional reflexes and weaves his life, values, and science into the tumultuous century of Russian history-particularly that of its intelligentsia-from the reign of tsar Nicholas I to Stalin's time. Ivan Pavlov was born to a family of priests in provincial Riazan before the serfs were emancipated, and made his home and professional success in the booming capital of St. Petersburg in late imperial Russia. He suffered the cataclysmic destruction of his world during the Bolshevik seizure of power and civil war of 1917-21, rebuilt his life in his seventies as a "prosperous dissident" during the Leninist 1920s, and flourished professionally as never before in the 1930s industrialization, revolution, and terror of Stalin times. Using a wide variety of previously unavailable archival materials, Todes tells a vivid story of that life and redefines Pavlov's legacy. Pavlov was not, in fact, a behaviorist who believed that psychology should address only external behaviors; rather, he sought to explain the emotional and intellectual life of animals and humans, "the torments of our consciousness." This iconic "objectivist" was actually a profoundly anthropomorphic thinker whose science was suffused with his own experiences, values, and subjective interpretations. Todes's story of this powerful personality and extraordinary man is based upon interviews with surviving coworkers and family members (along with never-before-analyzed taped interviews from the 1960s and 1970s), examination of hundreds of scientific works by Pavlov and his coworkers, and close analysis of materials from some twenty-five archives. The materials range from the records of his student years at Riazan Seminary to the transcripts of the Communist Party cells in his labs, and from his scientific manuscripts and notebooks to his political speeches; they include revealing love letters to his future wife and correspondence with hundreds of scholars, artists, and Communist Party leaders; and memoirs by many coworkers, his daughter, his wife, and his lover. The product of more than twenty years of research, this is the first scholarly biography of the physiologist to be published in any language.

First-ever comprehensive introduction to the major new subject of
