Fossweb: Teacher Preparation Videos

The motion of an object is determined by the sum of the forces (pushes and pulls) acting on it. You need a force to start moving, change the direction of, or stop an object. Force creates change in motion. A force can be seen or unseen. Objects and systems that turn on a central axis exhibit rotational motion. Balance is a result of equal effort.

Balance And Motion Worksheets & Teaching Resources | TpT

We live in a dynamic world where everything is in motion in different ways, as objects, move from one place to another, vibrate, or rotate around and around. Still other things are stationary, stable for a time, balanced on a thin line between stop and go. These are the global phenomena that students experience in the Balance and Motion Module.
