The Automotive Architecture of Frank Lloyd Wright - Gear ...

Frank Lloyd Wright (June 8, 1867 - April 9, 1959) was an American architect, designer, writer, and educator. He designed more than 1,000 structures over a creative period of 70 years. Wright believed in designing in harmony with humanity and its environment, a philosophy he called organic architecture. This philosophy was best exemplified by Fallingwater (1935), which has been called "the best ...

The first major presentation in decades of the visionary drawings of the artist-architect and master designer. Frank Lloyd Wright was an architect of vast and unprecedented vision, whose work is not only still admired by the critics and carefully studied by historians but is also widely beloved. Comfortable spaces, humanly scaled, with extraordinary attention to detail-as seen in a range of architectural forms-are at the center of Wright's enduring appeal. This vision and attention is nowhere more evident than in the drawings. It has been said that had Wright left us only drawings, and not his buildings as well, he would still be celebrated for his brilliant artistry, and this is borne out here. Even more significant, and shown here as never before, are the magical first moments of invention and inspiration-Wright's earliest sketches, some never before published-which offer unique insight into the mind of the master architect. Frank Lloyd Wright Designs is the most important and comprehensive book to be published on the drawings, designs, conceptual sketches, elevations, and plans of Wright, with particular emphasis on the development of certain important projects. It includes the best-known and beloved projects-like Fallingwater, The Coonley House, Midway Gardens, the Guggenheim, the Imperial Hotel-as well as a range of intriguing, unfamiliar, and previously unpublished drawings by Wright.

Conceived and developed as a companion volume to The Architecture of Frank Lloyd Wright.

Born in Wisconsin in 1867, Frank Lloyd Wright became obsessed with a set of building blocks his mother had given to him on his ninth birthday. He grew up to become the father of organic architecture and the greatest American architect of all time, having designed more than 1,100 buildings during his lifetime. These included private homes - such as the stunning Fallingwater, churches, temples, a hotel, and the world-famous Guggenheim Museum in New York City. When asked how he could create so many designs, he answered, "I can't get them out fast enough." Frank Lloyd Wright was a man ahead of his time who could barely keep up with his own ideas!

Frank Lloyd Wright's foray into affordable housing--the American System-Built Homes--is frequently overlooked. When Nicholas and Angela Hayes became stewards of one of them, they began to unearth evidence that revealed a one-hundred-year-old fiasco fueled by competing ambitions and conflicting visions that eventually gave way to Wright's most creative period.

Sixteen full-page designs adapted from windows in Wright buildings: Robie House, Dana House, Coonley Playhouse, many more. Geometrics, florals, etc. Color and hang near light source for glowing stained glass effects.

Describes the life and career of the famous architect.

Complete Wasmuth drawings, reproduced from a rare 1910 edition, feature Wright's early experiments in organic design. Includes 100 plates of public and private buildings from Oak Park period, plus Wright's Introduction and annotations.

Painstakingly researched and illuminating account of the making of the Fred C. Robie home. Revealing family documents, excerpts from a 1958 interview with Fred Robie, and 160 black-and-white illustrations.
