Fundamentals of Packaging Technology TABLE OF CONTENTS

Packaging is the science, art, and technology of enclosing or protecting products for distribution, storage, sale, and use. Packaging also refers to the process of design, evaluation, and production of packages. Packaging can be described as a coordinated system of preparing goods for transport, warehousing, logistics, sale, and end use.

Food Preservation Essential oils are volatile. Volatiles can permeate packaging materials and making the problem of contamination or isolation even more difficult. Water vapor is similar to an essential oil in that it readily permeates many packaging materials. The creation of high-barrier packaging systems is partly in response to the need for packaging that will either hold desirable gases and volatiles in the package or prevent undesirable
