Growth Of Slums Availability Of Infrastructure And

Research has shown that in long periods of recession more people moved to urban areas but also fewer houses were built so more slums developed. For example in cities like Liverpool and Sydney where capitalism was on the rise due to free-trading ports, slums were particularly visible during the 1850s to 1890s.

Urbanisation and the Rise of Slum Housing

Urbanisation and growth of slums Globally, today, more people live in urban areas than in rural areas. In 1950, 30% of the world's population was urban, but by 2050, 66% of the world's population is

Women and Geriatric Care for the Slum Population of Chennai City

7. Conclusion and Suggestions. The inspiration to write this book came from the collection of data for a Need Assessment Study of a local slum near my residence. The buildings in the slum locality, the inhabitants and their livelihood, the availability of infrastructure, both governmental and private, in their vicinity and above all, the requirements and expectations of the population, all helped me undertake this study and thus the outcome of the thesis and this book. Specific reference is made to only 4 divisions from 4 zones from the erstwhile Chennai city before the expansion of 2012.

Though expansion would have dispersed the ward and division numbers, the name of the location, its locality and the population remain the same. Therefore, I have simply changed the zone numbers to West, North, South-west and South. All the data

pertaining to this study limits to the year 2009. Though this parameter is in fact a shortcoming to the study, the hypotheses and its outcome remain significant to this day. Also the representing sample of 300 compared to the total population of 6,26,271 of the 4 zones put together is sufficient since the sample population and the total population are not spread away from each other.

The Challenge of Slums presents the first global assessment of slums, emphasizing their problems and prospects. Using a newly formulated operational definition of slums, it presents estimates of the number of urban slum dwellers and examines the factors at all level, from local to global, that underlie the formation of slums as well as their social, spatial and economic characteristics and dynamics. It goes on to evaluate the principal policy responses to

the slum challenge of the last few decades. From this assessment, the immensity of the challenges that slums pose is clear. Almost 1 billion people live in slums, the majority in the developing world where over 40 per cent of the urban population are slum dwellers. The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities, governments, civil society and the international community. This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes. The Global Report on Human Settlements is the most authoritative and up-to-date assessment of conditions and trends in the world's cities. Written in clear language and supported by informative graphics,

next three decades. Clearly, both the scale and pace of urbanization in Asia is unprecedented in human history and will dominate the global urbanization landscape. Asia's urbanization, in turn, is dominated by what is happening in China and India, the two most populous, fastest growing economies in the world. Cities of Dragons and Elephants: Urbanization and Urban Development in China and India aims at addressing the two most fundamental issues of urbanization: why and where to urbanize. Contributed by a team of top experts from both countries, it uses original research to explore both the speed and scale of urbanization and urban systems or spatial distribution of urbanities in different-sized cities. It examines various drivers of urbanization alongside the benefits and costs and the role of markets, governments, and NGOs. Cities of Dragons and Elephants presents evidence-based policy suggestions
