action, inspired in one way or another by the work of Jonathan Dancy--one of his generation's most influential moral philosophers. Many of the most influential living thinkers in the area are contributors to this collection, which also contains an autobiographical afterword by Dancy himself. Topics discussed in this volume include the idea that the facts that explain action are non-psychological ones; buck passing theories of goodness and rightness; the particularist idea that there are no true informative moral principles; egoism and impartial consequentialism; practical reasoning and inference; and the idea that there cannot be irreducibly normative properties.

*The Pursuit of Justice: A Personal Philosophical History* is a collection of renowned scholar and philosopher James P. Sterba's finest works - essays spanning the full spectrum of his illustrious career along with new scholarship on the enduring struggle for justice we face as a society, and as individuals in the modern world. That struggle, or pursuit, may be ongoing, but - as this book details - it has come a long way, and that progress, however frustrating it may be to obtain and secure, is a testament to the work to which scholars like Sterba have devoted their lives and careers.

W. David Solomon sits at the very center of the revival of virtue ethics. Solomon's work extended what began with the publication of G. E. M. Anscombe's "Modern Moral Philosophy" (1958) by solidifying virtue ethics as a viable approach within contemporary moral philosophy. *Beyond the Self: Virtue Ethics and the Problem of Culture* comprises twelve chapters: eleven that employ Solomon's work and legacy, followed by a twelfth concluding chapter by Solomon himself. Each chapter deepens and develops virtue ethics as a rich intellectual tradition rooted in Aristotle and Thomas Aquinas. Editor Raymond Hain divides the volume into three sections. The first addresses the historical contexts of happiness, justice, and mercy in the tradition of Aristotle and Thomas Aquinas. The second turns to recent themes in normative ethics, focusing on topics such as morality, virtue, and egoism. The third discusses broader ethical issues with significant cultural implications, such as human dignity, physician-assisted suicide, and secularization. *Beyond the Self* uncovers the shortcomings of contemporary moral philosophy and the depth and capacity of the Aristotelian and Thomistic traditions, reminding the reader that classical virtue ethics remains the most promising framework for understanding the moral life. Contributors include: Michael Beaty, Kevin L. Flannery, Raymond Hain, John Haldane, Thomas Hibbs, Irfan Khawaja, Alasdair MacIntyre, John O'Callaghan, Bryan C. Pilkington, W. David Solomon, Christopher Toner, and Candace Vogler.

textbook even-handedly raises important ethical questions and challenges readers to develop their own moral theories by applying them. This revision also presents an even broader presentation of various positions, featuring more feminist and multicultural perspectives as well. ETHICS: DISCOVERING RIGHT AND WRONG, 8E begins with easy to read chapters that introduce questions of meta-ethics and major moral theories. Later chapters address special topics in personal and religious ethics as well as the most recent developments in moral theory, including a new chapter on Biology and Ethics. Study questions for each chapter, along with useful bibliographies, make grasping the material more accessible than ever. Socrates said that moral philosophy deals with 'no small matter, but how we ought to live'. Beginning with a minimum conception of what morality is, the author offers discussions of the most important ethical theories. He includes treatments of such topics as cultural relativism, ethical subjectivism, psychological egoism, and ethical egoism.

The dawn of the Enlightenment saw heated debates on self-love. Do people only act out of self-interest? Or is there a less pessimistic explanation for human behaviour? Maurer delves into the contributions to these debates from both famous and lesser known authors, including Lord Shaftesbury, Bernard Mandeville, Francis Hutcheson, Joseph Butler, Archibald Campbell, David Hume and Adam Smith, and puts them in their philosophical, theological and economic context. Maurer identifies five distinct conceptions of self-love and looks at their role within theories of human psychology and morality while drawing attention to the heuristic limits of our contemporary notion of egoism. He compares the central arguments and the different strategies intended to morally rehabilitate human nature and self-love before and during the Enlightenment.

Arthur F. Holmes examines some of the major approaches to ethics, including cultural relativism, emotivism, ethical egoism and utilitarianism. He then outlines a Christian ethic and applies it to four moral issues: human rights, criminal punishment, the legislation of morality, and sexual behavior. Over the years the philosophical landscape has changed somewhat, and in this new edition Arthur Holmes adjusts the argument and information throughout, completely rewriting the earlier chapter on virtue ethics and adding a new chapter on the moral agent. - Publisher.

Steve Wilkens exposes the complex ethical systems lurking behind the most common slogans of our culture, offering a Christian evaluation of each. In this revised and expanded edition, the author has updated
