Here, There Be Dragons has made it onto my 'high fantasy' shelf for dozens of reasons. Characters you can befriend, a plot and storyline both tangled and exciting, literary references to blow your mind - I only have one reservation to prevent me from demanding all of my friends read this amazing book.

the ferocious Wendigo, half-man half-werewolf creatures, the three companions seek refuge on a ship - a ship that leads them to the extraordinary lands of myth and legend mapped in the precious book they carry. As their adventure unfolds we learn that the friends are in fact C.S Lewis, J.R.R Tolkien and Charles Williams - and as they discover that events in the known world mirror those in the imaginary realm, they come to realise the importance of the Imaginarium Geographica , and if not protected, there will be no peace from the war that rages in our world.

The Caretakers of the Imaginarium Geographica are at war. The last stones from the Keep of Time are falling, and, at the request of an old enemy, a new tower is being built in

our world. The old enemy is the Winter King's Shadow, and he wields a terrible weapon - the Spear of Destiny - which can be used to command the shadows of anyone it touches... including the protectors of the Archipelago, the dragons. The Shadow King returns to the Archipelago using the ship, the Iron Dragon, and enlists an unstoppable army of Dragon Shadows... While WWII rages in our world, all the caretakers, both past and present, must come together to save the Archipelago. All hope lies with a small group of companions, along with mythical knight, Don Quixote, who must sail beyond the very ends of the Archipelago in search of a broken sword, and the only being alive who can repair it: a scholar, who, once upon a time, was called Madoc.

lands of the Archipelago before it's too late." --

On a September evening in 1931, John and Jack, two of the Caretakers of the Imaginarium Geographica, discover a plea for help on an ancient medieval parchment. It seems to have been written by their friend, Hugo Dyson! But when they rush to warn him, they find that Hugo has already been abducted by fierce creatures called the Un-Men, who have mistaken him for the third Caretaker, Charles. And in that moment, the world begins to change... The Frontier which separates our world from the Archipelago of Dreams has fallen. Dark and terrible beasts roam throughout England. No one can be summoned from the Archipelago. And worse, their mentor and ally Bert

seems to have forgotten them entirely! The only hope of restoring order from the chaos lies on a forgotten island - where a time travel device left by Jules Verne must be used to race through history itself - from the Bronze Age, to the fall of Troy and the founding of the Silver Throne. And in that single night, John and Jack discover that the only way to save their friend and stop the chaos destroying the world is to solve a two-thousand year-old mystery: Who is the Cartographer?

When John, Jack, and Charles return to the Archipelago of Dreams, they encounter an apparent splintering of Time itself and set off on a new quest in which success and failure each carry a high cost.
