~~History of the Rain - Niall Williams - 9781408852057~~

A far greater mystery is the marvellous existence of a writer like Niall Williams... [He] really does write like an angel., History of the Rain is charming, wise and beautiful. It is a love letter to Ireland in all its contradictions, to literature and poetry and family.

Bedbound in her attic room beneath the falling rain, in the margin between this world and the next, Plain Ruth Swain is in search of her father, Virgil. To find him, enfolded in the mystery of ancestors, Ruthie must first trace the jutting jaw lines, narrow faces, and gleamy skin of the Swains from the restless Reverend Swain, her great-grandfather, to her grandfather Abraham, and finally to Virgil, through wild, rain-sodden history, exploits in pole-vaulting and salmon-fishing, poetry, and the 3,958 books piled high beneath the skylights in her room. Her funny, meandering narrative sings, moves, and irrevocably inspires.

We are our stories. We tell them to stay alive or keep alive those who only live now in the telling. In Faha, County Clare, everyone is a long story... Bedbound in her attic room beneath the falling rain, in the margin between this world and the next, Plain Ruth Swain is in search of her father. To find him, enfolded in the mystery of ancestors, Ruthie must first trace the jutting jaw lines, narrow faces and gleamy skin of the Swains from the restless Reverend Swain, her great-grandfather, to grandfather Abraham, to her father, Virgil - via pole-vaulting, leaping salmon, poetry and the three thousand, nine hundred and fifty eight books piled high beneath the two skylights in her room, beneath the rain. The stories - of her golden twin brother Aeney, their closeness even as he slips away; of their dogged pursuit of the Swains' Impossible Standard and forever falling just short; of the wild, rain-sodden history of fourteen acres of the worst farming land in Ireland - pour forth in Ruthie's still, small, strong, hopeful voice. A celebration of books, love and the healing power of the imagination, this is an exquisite, funny, moving novel in which every sentence sings.

Nicholas Coughlan is twelve years old when his father, an Irish civil servant, announces that God has commanded him to become a painter. He abandons the family and a wife who is driven to despair. Years later, Nicholas's own civil-service career is disrupted by tragic news: his father has burned down the house, with all his paintings and himself in it. Isabel Gore is the daughter of a poet. She's a passionate girl, but her brother is the real prodigy, a musician. And yet this family, too, is struck by tragedy: a seizure leaves the boy mute and unable to play. Years later, Isabel will continue to somehow blame herself, casting off her own chances for happiness. And then, the day after Isabel's wedding to man she doesn't love, Nicholas arrives on her western isle, seeking his father's last surviving painting. Suddenly the winds of fortune begin to shift, sweeping both these souls up with them. Nicholas and Isabel, it seems, were always meant to meet. But it will take a series of chance events--and perhaps, a proper miracle--to convince both to follow their hearts to where they're meant to be.

NAMED A BEST BOOK OF THE YEAR BY THE WASHINGTON POST and REAL SIMPLE A profound and enchanting new novel from Booker Prize-longlisted author Niall Williams about the loves of our lives and the joys of reminiscing. You don't see rain stop, but you sense it. You sense something has changed in the frequency you've been living and you hear the quietness you thought was silence get quieter still, and you raise your head so your eyes can make sense of what your ears have already told you, which at first is only: something has changed. The rain is stopping. Nobody in the small, forgotten village of Faha remembers when it started: rain on the western seaboard was a condition of living. Now--just as Father Coffey proclaims the coming of electricity--it is stopping. Seventeen-year-old Noel Crowe is standing outside his grandparents' house shortly after the rain has stopped when he encounters Christy for the first time. Though he can't explain it, Noel knows right then: something has changed. This is the story of all that was to follow: Christy's long-lost love and why he had come to Faha, Noel's own experiences falling in and out of love, and the endlessly postponed arrival of electricity--a development that, once complete, would leave behind a world that had not changed for centuries. Niall Williams' latest novel is an intricately observed portrait of a community, its idiosyncrasies and its traditions, its paradoxes and its inanities, its failures and its triumphs. Luminous and otherworldly, and yet anchored with deep-running roots into the earthy and the everyday, This Is Happiness is about stories as the very stuff of life: the ways they make the texture and matter of our world, and the ways they write and rewrite us.

From the authors of This Is Happiness and Her Name Is Rose, a memoir of life in rural Ireland and a meditation on the power, beauty, and importance of the natural world. 35 years ago, when they were in their twenties, Niall Williams and Christine Breen made the impulsive decision to leave their lives in New York City and move to Christine's ancestral home in the town of Kiltumper in rural Ireland. In the decades that followed, the pair dedicated themselves to writing, gardening, and living a life that followed the rhythms of the earth. In 2019, with Christine in the final stages of recovery from cancer and the land itself threatened by the arrival of turbines just one farm over, Niall and Christine decided to document a year of living in their garden and in their small corner of a rapidly changing world. Proceeding month-by-month through the year, and with beautiful seasonal illustrations, this is the story of a garden in all its many splendors and a couple who have made their life observing its wonders.

This story takes up where O Come Ye Back to Ireland left off. After learning they can't have children, Niall and Christine adopt their only child, Diedre, and continue their story in the pastoral farming community in the wild and beautiful Irish countryside.

From the bestselling author of The Ascent of Money and The Square and the Tower ["A dazzling history of Western ideas." "The Economist](#) ["Mr. Ferguson tells his story with characteristic verve and an eye for the felicitous phrase." "Wall Street Journal](#) ["W\]ritten with vitality and verve . . . a tour de force." "Boston Globe](#) Western civilization's rise to global dominance is the single most important historical phenomenon of the past five centuries. How did the West overtake its Eastern rivals? And has the zenith of Western power now passed? Acclaimed historian Niall Ferguson argues that beginning in the fifteenth century, the West developed six powerful new concepts, or ["killer applications"](#)—competition, science, the rule of law, modern medicine, consumerism, and the work ethic—that the Rest lacked, allowing it to surge past all other competitors. Yet now, Ferguson shows how the Rest have downloaded the killer apps the West once monopolized, while the West has literally lost faith in itself. Chronicling the rise and fall of empires alongside clashes (and fusions) of civilizations, Civilization: The West and the Rest recasts world history with force and wit. Boldly argued and teeming with memorable characters, this is Ferguson at his very best.

Niall and Christine left their careers in New York City for a simpler, more authentic life in a cottage outside the tiny village of Kilmihil in County Clare. "Their tale is a delightful romance."["The New York Times Book Review](#)

Presents Jim's story, from early days spent in County Clare to early adulthood in America, and back to Clare again. Tracing his journey from child, to husband to father, from happy-ever-after to death-do-us-part, from beginnings to endings, this work tells of the people and places in Jim's life, his hopes, fears and fantasies, and more.

"All disasters are in some sense man-made." Setting the annus horribilis of 2020 in historical perspective, Niall Ferguson explains why we are getting worse, not better, at handling disasters. Disasters are inherently hard to predict. Pandemics, like earthquakes, wildfires, financial crises, and wars, are not normally distributed; there is no cycle of history to help us anticipate the next catastrophe. But when disaster strikes, we ought to be better prepared than the Romans were when Vesuvius erupted, or medieval Italians when the Black Death struck. We have science on our side, after all. Yet in 2020 the responses of many developed countries, including the United States, to a new virus from China were badly bungled. Why? Why did only a few Asian countries learn the right lessons from SARS and MERS? While populist leaders certainly performed poorly in the face of the COVID-19 pandemic, Niall Ferguson argues that more profound pathologies were at work--pathologies already visible in our responses to earlier disasters. In books going back nearly twenty years, including Colossus, The Great Degeneration, and The Square and the Tower, Ferguson has studied the foibles of modern America, from imperial hubris to bureaucratic sclerosis and online fragmentation. Drawing from multiple disciplines, including economics, climodynamics, and network science, Doom offers not just a history but a general theory of disasters, showing why our ever more bureaucratic and complex systems are getting worse at handling them. Doom is the lesson of history that this country--indeed the West as a whole--urgently needs to learn, if we want to handle the next crisis better, and to avoid the ultimate doom of irreversible decline.
