Track lighting can give you grief when track connectors become loose, dirty or inserted ever so incorrectly. To tighten things up, pry track contacts carefully back into place as needed. To clean, you can use really fine sandpaper to go over the metal connections on the light and track. Helpful Hints for Selecting Home Lighting

Home Lighting - | Home Repair

Check the Fuses. If one of your light strings isn't working at all, or if only half of the lights are working, unplug the string and look for a small access door on one side of the male plug (the one with the prongs). If you find one, open it and inspect the very small fuses inside the plug. There should be two.

Inspect and replace your engine air filter. Just unscrew or unclip the air filter box retainers and remove the old filter. Then hold a shop light behind the filter to see how much light passes through. If the filter blocks 50 percent or more of the light, replace the filter. If not, put it back in, secure the air filter box cover and keep driving.

LED stands for light emitting diode and refers to a lighting element that is purer and stronger than regular incandescent light. LED lights are commonly found in long strings of lights used at Christmas and other holidays for decoration. You may find that some LEDs stop working, and this causes many people to dispose of the entire string.
