What is the shortest possible route for a traveling salesman seeking to visit each city on a list exactly once and return to his city of origin? It sounds simple enough, yet the traveling salesman problem is one of the most intensely studied puzzles in applied mathematics—and it has defied solution to this day. In this book, William Cook takes readers on a mathematical excursion, picking up the salesman's trail in the 1800s when Irish mathematician W. R. Hamilton first defined the problem, and venturing to the furthest limits of today's state-of-the-art attempts to solve it. He also explores its many important applications, from genome sequencing and designing computer processors to arranging music and hunting for planets. In Pursuit of the Traveling Salesman travels to the very threshold of our understanding about the nature of complexity, and challenges you yourself to discover the solution to this captivating mathematical problem.

"In 1784, travel wrenched Thomas Jefferson out of the darkest period of his life. He sailed to France a broken man, but on the road, he rediscovered a world of hidden beauty and penned a guide he called Hints for Americans Traveling in Europe. During a crisis of his own, Derek Baxter dares himself to follow Jefferson's route. On a series of journeys (piloting a Dutch canal boat, hiking the French Alps, and fishing in the Atlantic), Baxter follows the obscure guide across six countries. But not all of his insights into the life of the complex founding father are pleasant. In Pursuit of Jefferson is the surprising story of one man's travels through Europe, led by Thomas Jefferson, and the lessons he learns about history—and himself—along the way!"

This collection of Alaskan adventures begins with a newspaper article written by John Muir during his first visit to Alaska in 1879, when the sole U.S. government representative in all the territory's 586,412 square miles was a lone customs official in Sitka. It closes with accounts of the gold rush and the 1909 Alaska-Yukon-Pacific Exposition in Seattle. Jean Meaux has gathered a superb collection of articles and stories that captivated American readers when they were first published and that will continue to entertain us today. The authors range from Charles Hallock (the founder of Forest and Stream, a precursor of Field and Stream) to New York society woman Mary Hitchcock, who traveled with china, silver, and a 2,800 square foot tent. After explorer Henry Allen wore out his boots, he marched barefoot as he continued mapping the Tanana River, and Episcopal Archdeacon Hudson Stuck mushed by dog sled in Arctic winters across a territory encompassing 250,000 miles of the northern interior. Although the United States acquired Alaska in 1867, it took more than a decade for American writers and explorers to focus attention on a territory so removed from their ordinary lives. These writers-adventurers, tourists, and gold seekers—would help define the nation's perception of Alaska and would contribute to an image of the state that persists today. This collection unearths early writings that offer a broad view of American encounters with Alaska accompanied by Meaux's lively and concise introductions. The present-day adventurer will find much to inspire exploration, while students of the American West can gain new access to this valuable trove of pre-Gold Rush Alaska archives. An intimate journey across and in search of America, as told by one of its most beloved writers, in a deluxe centennial edition In September 1960, John Steinbeck embarked on a journey across America. He felt that he might have lost touch with the country, with its speech, the smell of its grass and trees, its color and quality of light, the pulse of its people. To reassure himself, he set out on a voyage of rediscovery of the American identity, accompanied by a distinguished French poodle named Charley; and riding in a three-quarter-ton pickup truck named Rocinante. His course took him through almost forty states: northward from Long Island to Maine; through the Midwest to Chicago; onward by way of Minnesota, North Dakota, Montana (with which he fell in love), and Idaho to Seattle, south to San Francisco and his birthplace, Salinas; eastward through the Mojave, New Mexico, Arizona, to the vast hospitality of Texas, to New Orleans and a shocking drama of desegregation; finally, on the last leg, through Alabama, Virginia, Pennsylvania, and New Jersey to New York. Travels with Charley in Search of America is an intimate look at one of America's most beloved writers in the later years of his life—a self-portrait of a man who never wrote an explicit autobiography. Written during a time of upheaval and racial tension in the South—which Steinbeck witnessed firsthand—Travels with Charley is a stunning evocation of America on the eve of a tumultuous decade. This Penguin Classics Deluxe Edition also features French flaps and deckle-edged paper. For more than sixty-five years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,500 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

In The Pursuit of Happiness Bianca C. Williams traces the experiences of African American women as they travel to Jamaica, where they address the perils and disappointments of American racism by looking for intimacy, happiness, and a connection to their racial identities. Through their encounters with Jamaican online communities and their participation in trips organized by Girlfriend Tours International, the women construct notions of racial, sexual, and emotional belonging by forming relationships with Jamaican men and other "girlfriends." These relationships allow the women to exercise agency and find happiness in ways that resist the damaging intersections of racism and patriarchy in the United States. However, while the women receive a spiritual and virtual connection to Jamaica in order to live happily in the United States, their notion of happiness relies on travel, which requires leveraging their national privilege as American citizens. Williams's theorization of "emotional transnationalism" and the construction of affect across diasporic distance attends to the connections between race, gender, and affect while highlighting how affective relationships mark nationalized and gendered power differentials within the African diaspora.

Each year more and more hunters accept the challenge of bagging their quarry with a handgun. This book provides the information needed to hunt everything from jackrabbits to elephants. Everyone deserves to make their dreams a reality. What dreams of yours have you deferred for too long? It's all too common for our passions to fall by the wayside amongst the daily grind of ordinary living. Are you ready to take one step today toward answering your heart's calling and fulfilling your destiny?In The Pursuit of Dreams, Dr. Drago shares the deeply personal experience of how he accomplished his dreams—including traveling to the North and South Poles without any money or connections—to show how you can reclaim your power and take charge of your life by listening to the voice of Truth. Travel the world with Dr. Drago, go behind the scenes in Silicon Valley and NASA headquarters, and meet an eclectic cast of characters, including a Buddhist teacher, an Army veteran, a monk from Transylvania, an innovator at Google, and a NASA legend. Their fascinating conversations connect science, spirituality, and entrepreneurship to inspire and empower you to realize your dreams.

A remarkable guide to the quests that give our lives meaning—and how to find your own—from the New York Times bestselling author of The \$100 Startup and 100 Side Hustles "If you like complacency and mediocrity, do not read this book. It's dangerously inspiring."—A. J. Jacobs, author of The Know-It-All When he set out to visit all of the planet's countries by age thirty-five, compulsive goal-seeker Chris Gullebeau never imagined that his journey's biggest revelation would be how many people like himself exist—each pursuing a challenging quest. These quests are as diverse as humanity itself, involving exploration, the pursuit of athletic or artistic excellence, or battling against injustice and poverty. Everywhere that Chris visited he found ordinary people working toward extraordinary goals, making daily down payments on their dreams. These "questers" included a suburban mom pursuing a wildly ambitious culinary project, a DJ producing the world's largest symphony, a young widower completing the tasks his wife would never accomplish—and scores of others writing themselves into the record books. The more Chris spoke with these strivers, the more he began to appreciate the direct link between questing and long-term happiness, and he was compelled to complete a comprehensive study of the phenomenon. In The Happiness of Pursuit, he draws on interviews with hundreds of questers, revealing their secret motivations, their selection criteria, the role played by friends and family, their tricks for solving logistics, and the importance of documentation. Equally fascinating is Chris's examination of questing's other side. What happens after the summit is climbed, the painting hung, the endurance record broken, the at-risk company saved? A book that challenges each of us to take control—to make our lives be about something while at the same time remaining clear-eyed about the commitment—The Happiness of Pursuit will inspire readers of every age and aspiration. It's a playbook for making your life count. "The Happiness of Pursuit is smart, honest, and dangerous. Why dangerous? Because it is as practical as it is inspiring. You won't just be daydreaming about your quest—you'll be packing for it!"—Brené Brown, Ph.D., LMSW, author of Daring Greatly

"Travel is no longer a past-time but a colossal industry, arguably one of the biggest in the world and second only to oil in importance for many poor countries. One out of 12 people in the world are employed by the tourism industry which contributes \$6.5 trillion to the world's economy. To investigate the size and effect of this new industry, Elizabeth Becker traveled the globe. She speaks to the Minister of Tourism of Zambia who thinks licensing foreigners to kill wild animals is a good way to make money and then to a Zambian travel guide who takes her to see the rare endangered sable antelope. She travels to Venice where community groups are fighting to stop the tourism industry from pushing them out of their homes, to France where officials have made tourism their number one industry to save their cultural heritage; and on cruises speaking to waiters who earn \$60 a month—then on to Miami to interview their CEO. Becker's sharp depiction reveals travel as a product; nations as stewards. Seeing the tourism industry from the inside out, the world offers a dizzying range of travel options but very few quiet getaways!"

A brilliant, far-reaching exploration of the frontiers of noise and silence, and the growing war between them. Between iPods, music-blasting restaurants, earsplitting sports stadiums, and endless air and road traffic, the place for quiet in our lives grows smaller by the day. In Pursuit of Silence gives context to our increasingly desperate sense that noise pollution is, in a very real way, an environmental catastrophe. Traveling across the country and meeting and listening to a host of incredible characters, including doctors, neuroscientists, acoustical engineers, monks, activists, educators, marketers, and aggrieved citizens, George Prochnik examines why we began to be so loud as a society, and what it is that gets lost when we can no longer find quiet.
