A Beginner's Guide to Local Chicken Farming + eBook

Indigenous chicken farming has been described variously as backyard poultry rearing, rural poultry production or scavenging. For our purpose, any flock of chicken that are kept under free-range management and on which no selection of breeds or improvement by crossbreeding has been done is considered as a flock of indigenous chicken. Indigenous chicken lay between 8 and 15 eggs per clutch depending on availability of feed. They are broody and hatch about 80% of the

Technical Note Series - YATMACK INC

Indigenous chicken production systems are mostly based on the local scavenging domestic fowl (Gallus domesticus), which predominates in African villages. Sometimes the productivity of these birds is very low, but with proper management practices indigenous chicken can become very productive and have a very good potential for improving the income of the owners.
