Now available in a new format and fresh package: a children's book by the authors of the New York Times best-selling children's book Incredible You. This book offers 10 lessons for children for leading fulfilled, self-actualized lives. Dr. Wayne W. Dyer believed that if children could hold on to the no-limit thinking they were born with rather than trying to fit in, they could learn to truly enjoy life and become unstoppable as they strive to attain their dreams. Newly repackaged with a fresh format and cover, Unstoppable Me! is based on 10 important lessons, including the value of taking risks, dealing with stress and anxiety, and learning to enjoy each moment. Each point includes an example showing how a child might apply the concept in his or her everyday life. At the end of this book, a reader's guide offers 10 questions to help spark discussion and to further reinforce Wayne's message. Whimsically illustrated by Stacy Heller Budnick.

Monroe County, New York, 1873: Confused on what to think about the suffragist movement, a young boy stops at one of Susan B. Anthony's pre-trial speeches. 'You can learn from your failures.' 'Entrepreneurship is trial and error.' These statements are hard to disagree with, but in reality it is not that simple. More than ever, we wish to be successful and erase all traces of mistakes and failures as soon as possible. This is not only a pity, but potentially dangerous as well, says professor Paul Louis Iske. Only when we dare to face what we do wrong can we make a thorough analysis and avoid unnecessary recurrence and disappointments. Fear of failure impedes creative thinking and innovation. This compelling book shows you how to develop a culture of openness in your organization and how failure paradoxically leads to significant progress. Institute of Brilliant Failures teaches you how to recognize recurring failing patterns at an early stage, how to harvest essential learnings and how to embrace uncertainty. Paul Louis Iske is professor of Open Innovation and Business Venturing at the School of Business and Economics, Maastricht University (the Netherlands) and Extraordinary Professor of Knowledge Management at Stellenbosch University (South Africa). He is Chief Failure Officer (CFO) at the Institute of Brilliant Failures, and a sought-after international consultant in the areas of innovation, sustainable business models, creativity and knowledge management.

Throughout human history, the relationships of individuals and groups have been disrupted by what the authors sum up as "demonization," the attribution of basic destructive qualities to the other or to forces within the self. Demonization results in constant suspicion and blame, a systematic disregard of positive events, pressure to eradicate the putative negative persons or forces, and a growing readiness to engage in escalating conflict. Richly illustrated with 24 case stories, this book explores the psychological processes involved in demonization and their implications for the effort to effect change in relationships, psychotherapy, and beyond the office or clinic in the daily lives of families, organizations, and societies. Recent popular psychology--the authors argue--has tended to encourage demonization. An appropriate alternative to this view is known as the "tragic view": Suffering is inevitable in life; negative outcomes are a result of a confluence of factors over which one has only a very limited control; there is no possibility of reading into the hidden "demonic" layers of the other's mind; the other's actions, like our own, are multiply motivated; escalation is a tragic development rather than the result of an evil "master plan"; and finally, skills for promoting acceptance and reducing escalation are necessary for diminishing interpersonal suffering. The authors describe and illustrate a series of these skills both for psychotherapy and for personal use. Finally, they lay out an approach to consolation and acceptance, the neglect of which they attribute to the dominance of demonic views. The Psychology of Demonization: Promoting Acceptance and Reducing Conflict will be appreciated by all those professionally and personally concerned with the state of relationships.

Non-violent resistance (NVR) is an approach for parents and other caregivers that helps to increase presence and overcome impulsive and dangerous behaviors, while reducing conflict and escalation. The practical, evidence-based advice accompanies a detailed list of all the new applications of NVR and an overview of the supporting literature. A step-by-step presentation of the treatment is laid out alongside a useful model on escalation and its prevention. The approach achieves high parent engagement and cooperation, with over twenty controlled studies showing that NVR effectively reduces parental helplessness, parental impulsiveness, parent-child conflicts, and family discord.

Drawing on empirical research exploring mainstream religious belief and identity in Euro-American countries, Abby Day explores how people 'believe in belonging', choosing religious identifications to complement other social and emotional experiences of 'belongings'.
