With the ongoing global economic crisis still taking full effect on today's society, International Corporate Finance 1e brings a fresh approach and perspective on present events. This text focuses on a key player in this financial world: multinational corporations (MNC). By applying general financial concepts and procedures, it explains the conduct of financial management in MNCs. Because most corporations are either directly or indirectly affected by multinational entities and have a global exposure, a study of MNC financial management has broad applicability. This new text takes a quantitative

approach with an emphasis on excel spreadsheets and current examples.

Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

A fully revised edition of one of the most influential books ever written on personal finance with more than a million copies sold "The best book on money. Period." –Grant Sabatier, founder of "Millennial Money," on CNBC Make It "This is a wonderful book. It can really change your life." -Oprah For more than twenty-five years, Your Money or Your Life has been considered the go-to book for taking back your life by changing your relationship with money. Hundreds of thousands of people have followed this nine-step program, learning to live more deliberately and meaningfully with Vicki Robin's guidance. This fully revised and updated edition with a foreword by "the Frugal Guru" (New Yorker) Mr. Money Mustache is the ultimate makeover of this bestselling classic, ensuring that its time-tested wisdom applies to people of all ages and covers modern topics like investing in index funds, managing revenue streams like side hustles and freelancing, tracking your finances online, and having difficult conversations about money. Whether you're just beginning your financial life or heading towards retirement, this book will show you how to: □ Get out of debt and develop savings □ Save money through mindfulness and good habits, rather than strict budgeting □ Declutter your life and live well for less □ Invest your savings and begin creating wealth □ Save the planet while saving money □ ...and so much more! "The seminal guide to the new morality of personal money management." -Los Angeles Times

The first edition, Money Laundering, A Handbook for CDD Compliance provides empirical facts of money laundering that forced the world to unite to combat corruption, money laundering and terrorist financing. Authored by Oliver, Master of Laws and Accountant (UK), obtained the foundation of the Handbook from in-depth research supporting the complexity of the society matrix attributing to crimes in the Asia and Southeast Asia regions. In this comprehensive handbook, FATF members and DNFBPs follow the FATF universal standards to fight money laundering and terrorist financing. The NCB confiscation measure threatens property of the criminals. How corruption, money laundering occurs and how organised crime survive? How terrorists create terror and how IS survive? How lawyer Robin defence for not reporting a suspicious transaction? How identity verification for Arumugam s/o Muthu exempted? This handbook provides the answer. UN instruments and FATF preventive measures compliance are mandatory. Failure to comply undermines the status of the

FATF member. For the DNFBP, the penalty will occur. To discharge mandatory compliance, the FATF standards and the application of the principles require guidance and illustration of hypothesis examples of different DNFBP service providers. Also, with the precedent forms and flowcharts to assist the compliance officers. Transforming the FATF standards into domestic statues, Singapore model was adopted. Further, how Mutual Evaluation operates to assess the risk of a nation in AML/CFT reveals the effectiveness of the AML/CFT system in force. Success in AML/CFT is the acquisition of the detection skill of a suspicious transaction and a competent authority.

The many recent high profile corporate scandals highlight the need for companies to do a better job of integrating ethics and responsibility into business decisions - and for business schools to integrate ethics awareness and training into their curricula. This volume sets the agenda for business ethics and corporate responsibility in the future. It brings together ideas, challenges, and proposed solutions for thinking about - and implementing - effective ethics programs in business schools and business organizations. Edited by two highly regarded business educators, and featuring contributions by leading scholars and administrators, *Business Ethics: New Challenges for Business Schools and Corporate Leaders* covers all dimensions of ethical decision making - individual, organizational, and societal. The thirteen original chapters offer new and emerging perspectives for creating ethical business leadership and developing organizational ethics initiatives.

The increasing dominance of the Asia-Pacific region as a source of international business growth has created a dynamic and complex business environment. For this reason, a sound understanding of regional economies, communities and operational challenges is critical for any international business manager working in a global context. With an emphasis on 'doing business in Asia', *Contemporary International Business in the Asia-Pacific Region* addresses topics that are driving international business today. Providing content and research that is accessible to local and international students, this text introduces core business concepts and comprehensively covers a range of key areas, including trade and economic development, dimensions of culture, business planning and strategy development, research and marketing, and employee development in cross-cultural contexts. Written by authors with industry experience and academic expertise, *Contemporary International Business in the Asia-Pacific Region* is an essential resource for students of business and management.

"The second edition of *Modern Corporate Finance: Theory and Practice* combines a forward-looking vision of corporate finance with the tried and true practices of the past. This text emphasizes the modernist movement in finance, which is based on systematic methodology with an emphasis on deductive reasoning and empirical validation. The modernist movement produces a market-value-based approach to finance that emphasizes shareholder wealth maximization, options, and agency relationships. This movement has expanded without question, the frontiers of knowledge in finance. Until *Modern Corporate Finance: Theory and Practice*, instructors have lacked a framework from which to teach these concepts at the introductory level."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. When Robin Chase cofounded Zipcar, she not only started a business but established the foundation for one of the most important economic and social ideas of our time: the collaborative economy. With this important book, she broadens our thinking about the ways in which the economy is being transformed and shows how the Peers Inc model is changing the very nature of capitalism. When the best of people power is combined with the best of corporate power to form “Peers Inc” organizations, a potent creative force is released. The “Inc” in these collaborations delivers the industrial strengths of significant scale and resources, and the “Peers” bring together the individual strengths of localization, specialization, and customization, unlocking the power of the collaborative economy. When excess capacity is harnessed by the platform and diverse peers participate, a completely new dynamic is unleashed. In Peers Inc, Robin Chase brings her provocative insights to work, business, the economy, and the environment, showing:

- How focusing on excess capacity transforms the economics of what's possible and delivers abundance to all
- How the new collaboration between the Inc and the Peers enables companies to grow more quickly, learn faster, and deliver smarter products and services
- How leveraging the Peers Inc model can address climate change with the necessary speed and scale
- How the Peers Inc model can help legacy companies overcome their shortening life cycle by inviting innovation and evolution
- Why power parity between the Peers and the Inc is a prerequisite for long-term success
- How platforms can be built within the existing financial system or outside of it
- What government can do to enhance economic possibility and protect people working in this new decentralized world

Chase casts a wide net, illuminating the potential of the Peers Inc model to address broader issues such as climate change and income inequality, and proves the impact that this innovative economic force can have on the most pressing issues of our time.

Cross-border Partnerships in Higher Education looks beyond student and faculty exchanges to examine the myriad ways international colleges and universities work together as institutions. These partnerships have involved the creation of branch campuses, joint research and technology initiatives, collaboration in strengthening institutional management, testing, faculty development efforts, collaboration in quality assurance, and sharing of technology. Cross-national collaborations are a growing financial and informational resource for universities, and non-Western schools are increasingly taking part. The volume provides an overview of the purposes and types of cross-border collaborations, an analysis of the benefits, and an examination of issues arising from these efforts. A cross-cutting goal is to provide a critical look at the models being employed, the challenges encountered, and the unintended consequences of such collaboration, both positive and negative. The book is intended for scholars and students of international higher education, higher education leaders and practitioners who are charting a course toward greater cross-border collaboration, and leaders in international development assistance organizations that are often asked to support such initiatives.
