Client Server

Introduction. A

client/server

application is a

computer program

that allows a

user to access

something that

is stored in a

server. Of

course, both

computers can be

workstations and

Download File

PDF

can run the same type of operating system. In most networking environments, the server holds a database and users must access that database from their workstations. If you want to

Download File

PDF

create a client/server database application, you have many choices among Microsoft Access, XML, file processing, MySQL, Oracle, etc.
