the best information from three previous books in this area. The combined thrust of this information is that the highest level functions of the building and facility automation system are delivered by a web based EIS/ECS system that provides energy management, facility management, overall facility operational management and ties in with the enterprise resource management system for the entire facility or the group of facilities being managed.

Covering the basic concepts and principles of Information Technology (IT), this book gives energy managers the knowledge they need to supervise the IT work of a consultant or a vendor. The book provides the necessary information for the energy manager to successfully purchase, install, and operate complex, Web-based

replete with history: Tucson was originally settled by ancient Native American peoples, Spanish explorers, and Anglo frontiersmen, and their legacy is clearly evident. While the Tucson area holds special appeal for naturalists, hikers, and birdwatchers, there are countless outdoor recreation options available—everything from ballooning to trail riding on horseback—and myriad indoor options like museums and galleries, music and dance performances, too. Tucson's world-class resorts and spas, along with its top-rated golf courses, make it one of the best relaxation destinations in the country. And there's no better Sonoran food north of the Mexican border than here in the Old Pueblo. Tucson offers something for everyone. Detailed maps and the author's selective recommendations make this book a must-have for travelers and residents alike.
