Event Management is a process included in the ITIL® Service Operation phase: By definition, an event is a " change of state that has significance for the management of an IT service or other configuration item (CI) ". Events are typically recognized through alerts or notifications detected by a monitoring tool.

Event Management - ITIL® Process | Doc - Octopus
ITIL event management detects events that occur across a business' IT infrastructure. Of the many events that can arise, some may be problematic, while others are simply part of normal operations. The goal of event management is to analyze events to determine if any action should be taken.

Free ITIL Templates | SmartSheet
Interfaces between Event Management and the other ITIL processes were adjusted in order to reflect the new ITIL process structure in ITIL V3. In ITIL 2011 Event Management has been updated to reflect the concept of 1st Level Correlation and 2nd Level Correlation. The process flows reflect the more detailed guidance in the ITIL 2011 books. The process overview of ITIL Event Management shows the key information flows (see fig. 1).

Event Management - The ITIL® Wiki | IT Process Maps
Event Management, as defined by ITIL, is the process that monitors all events that occur through the IT infrastructure. It allows for normal operation and also detects and escalates exception conditions. An event can be defined as any detectable or discernible occurrence that has significance for the management of the IT Infrastructure or the delivery of IT service and evaluation of the impact a deviation might cause to the services. Events are typically notifications created by an IT service. C

Event management (ITIL) - Wikipedia
Training sessions on release management process, policies, procedures and technical knowledge is a must which should happen at regular intervals. Most of the delays and discrepancies in release management operations happen due to unawareness on process, policies, and procedures; hence, it is a mandatory objective for IT management to conduct training sessions which can bring thorough awareness ...

Release Management Best Practices in ITIL | ITIL Docs
Thorough event management makes IT systems more proactive and holistic. ITIL Event management definition Event management is monitoring the events that occur through changes and improvements in IT infrastructure. Doing this lets normal operations continue while also detecting 'exception conditions' or 'exceptional events'.

ITIL Event Management: Definition, Tools & Metrics
The processes of IT Service Management are guided by a controlled information flow. It contains a number of standardized process documents described here. A great amount of these documents pass more than one ITSM discipline, which makes a classification by the disciplines confusing. Hence they are presented here in alphabetical order.

ITSM Wiki - Documents of IT Service Management
Event Management is therefore the basis for Operational Management Monitoring, Control, and Notification and is ITIL conformant. The process is made up of interrelated activities, including activities that measure the effectiveness of the process, as well as provide for continued process improvement.

Event Management - VA.gov Home
This set of ITIL templates (ITIL document templates) can be used as checklists for defining ITIL process outputs. They can also serve as guidelines which are helpful during process execution. There are now 102 officially licensed checklists contained in our ITIL-compliant Reference Process Model, and we make the most popular ITIL templates available for you in our ITIL Wiki.

ITIL Checklists | IT Process Wiki
Event Management Catalogue The purpose of this document is to define event categories, which are necessary for event classification, and define distribution. The document is optimized for small and medium-sized organizations – we believe that overly complex and lengthy documents are just overkill for you. This document is an appendix.

Event Management Catalogue [ITIL templates]
An event can be defined as any detectable or discernable occurrence that has significance for the management of the IT Infrastructure of the delivery of IT service and evaluation of the impact a deviation might cause to the services. Events are typically notifications created by an IT service, configuration item or monitoring tool.

ITIL A guide to Event Management - Front Metrics Technologies
A policy based IT service management methodology begins with customers generating requirements that input to the Requirements Definition Process. A set of processes qualifies and quantifies the requirements, determines metrics, and details aspects of the service to be provided so that it will align IT to satisfy the business need.
