The 'clean' light is constantly flashing means a heating fault has been detected. Most likely you will experience this error code if your KitchenAid dishwasher is not getting hot or not drying properly. The two main components of the dishwasher which control the temperature are the heating element and the temperature sensor/thermostat.

A Kitchen Aid dishwasher can leak for various reasons. If your unit is leaking, look for the following causes: Not level: A dishwasher needs to be level to work properly. Verify that your dishwasher is level to rule this out as the cause of the leak. Water supply line leaks: If the water supply line that feeds water to the dishwasher is leaking, it can look like the dishwasher is leaking.

A possible cause for a KitchenAid dishwasher not draining is a defective drain pump. The drain pump forces the water through the drain hose. If you continue to find water in bottom of dishwasher, a failed pump may be the culprit. The pump is not repairable – if you have a defective pump it needs to be replaced.
