- Kulingana na wataalam, kuna sababu kadhaa ambazo humfanya mwanamke kulia au kujawa na huzuni baada ya kushiriki ngono, na mojawapo ya sababu hizo ni homoni ambazo mwili wa binadamu hutoa wakati huo. Umewahi kushiriki mapenzi na kugundua kuwa mpenzi wako amelia tu, baada ya kipindi kirefu cha kufurahisha? Kulingana na wanasayansi, ni kawaida.

This short book includes basic demon and angel knowledge and strategy to understand demon energy and angel configurations. It also includes instructions for how to think to correct accidents by warning people before they happen but after the fact, how to stay young looking, how to heal people from just about anything, and information on the Mandela effect and how it became our reality.

Originally published in 1904, this book presents vocabularies for the Kamba and Kikuyu languages, with a facing-page Swahili vocabulary, aimed at English speakers. The object in publishing a Swahili vocabulary parallel with the Kamba and Kikuyu was to emphasise the intimate relationship between the three languages. This book will be of value to anyone with an interest in East African languages and the historical development of linguistics.

"Following on the successes of two previous dictionary projects, the CRC World Dictionary of Plant Names and the CRC World Dictionary of the Grasses, Umberto Quattrocchi has undertaken this dictionary of economically important plants.... He has done for these plants what was so admirably done in his other works—brought the vast and scattered literature on plant names, and in this case, too, their uses, into coherent order so that the inquisitive scholar can get a foothold." —From the Foreword, Donald H. Pfister, Harvard University and Harvard University Herbaria, Cambridge, Massachusetts The CRC World Dictionary of Medicinal and Poisonous Plants: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology provides the starting point for better access to data on plants used around the world in medicine, food, and cultural practices. The material found in the five volumes has been painstakingly gathered from papers of general interest, reports and records, taxonomic revisions, field studies, herbaria and herbarium collections, notes, monographs, pamphlets, botanical literature, and literature tout court. It includes sources available at various natural history libraries, floras and standard flora works, local floras and local histories, nomenclatural histories, and the International Code of Botanical Nomenclature. Much more than a dictionary, the book provides the names of thousands of genera and species of economically important plants, concise summaries of plant properties, and appropriate observations about medicinal uses. Drawing from a tremendous range of primary and secondary sources, it is an indispensable time-saving guide for all those involved with botany, herbal medicine, pharmacognosy, toxicology, medicinal and natural product chemistry, and agriculture.
