The authors reveal that in light of prevailing social inequalities, health policies may intend to protect public health, but in fact they often represent significant structural threats to the health and well being of the poor, ethnic minorities, women, and other subordinate groups. The volume focuses on the 'anthropology of policy,' which is concerned with the process of decision-making, the influences on decision-makers, and the impact of policy on human lives. This collaboration will be a critical resource for researchers and practitioners in medical anthropology, applied anthropology, medical sociology, minority issues, public policy, and health care issues.
