Lean IT: Enabling and Sustaining Your Lean Transformation ...

Lean IT is the extension of lean manufacturing and lean services principles to the development and management of information technology products and services. Its central concern, applied in the context of IT, is the elimination of waste, where waste is work that adds no value to a product or service. Although lean principles are generally well established and have broad applicability, their extension from manufacturing to IT is only just emerging. Lean IT poses significant challenges for practice.
