Study & Master Life Sciences Grade 10 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Life Sciences. The comprehensive Learner's Book includes: * an expanded contents page indicating the CAPS coverage required for each strand * a mind map at the beginning of each module that gives an overview of the contents of that module * activities throughout that help develop learners' science knowledge and skills as well as Formal Assessment tasks to test their learning * a review at the end of each unit that provides for consolidation of learning * case studies that link science to real-life situations and present balanced views on sensitive issues. * 'information' boxes providing interesting additional information and 'Note' boxes that bring important information to the learner's attention

Life Science for grades 5 to 8 is designed to aid in the review and practice of life science topics. Life Science covers topics such as classifying animals, plant and animal structures, life cycles, biomes, and energy transfer. The book includes realistic diagrams and engaging activities to support practice in all areas of life science. The 100+ Series science books span grades 5 to 12. The activities in each book reinforce essential science skill practice in the areas of life science, physical science, and Earth science. The books include engaging, grade-appropriate activities and clear thumbnail answer keys. Each book has 128 pages and 100 pages (or more) of reproducible content to help students review and reinforce essential skills in individual science topics. The series is aligned to current science standards.

Study & Master Life Sciences was developed by practising teachers, and covers all the requirements of the National Curriculum Statement for Life Sciences. Learner's Book: module openers, explaining the outcomes icons, indicating group, paired or individual activities key vocabulary boxes, which assist learners in dealing with new terms activities to solve problems, design solutions, set up tests/controls and record results assessment activites case studies, and projects, which deal with issues related to the real world, and move learners beyond the confines of the classroom Teacher's Guide: An overview of the RNCS an introduction to outcomes-based education a detailed look at the Learning Outcomes and Assessment Standards for Life Sciences, and how much time to allocate to each during the year information on managing assessment solutions to all the activities in the Learner's Book photocopiable assessment sheets

Help students grasp the "Big Ideas" of biology
