Problems With Solution

There is a simple trick
behind solving word
problems using linear
equations. The picture
shown below tells us the
trick. If the numerator of
a fraction is increased by

Download Free Linear Word

2 and the denominator by 1, it becomes 1. In case, the numerator is decreased by 4 and the denominator by 2, it becomes $\frac{1}{2}$. Find the fraction.

Download Free Linear Word

It is evident that the word linear programming implies that all the constraints and the objective function are expressed as linear functions of the variables. Linear relationship means that when one factor changes so does another by a constant amount. Solution of Linear Programming Problems:
