Magicians of the Gods (2015) - Graham Hancock Official Website

Magicians of the Gods is an eye opener and an amazing read. I found Graham Hancock while perusing YouTube one day, listened to him for about 30 minutes and just had to buy his books. Keep an open mind if you decide to read this book, and I do recommend it-- more so if you are fascinated by the ancient world.

Magicians of the Gods: Sequel to the International ...

Magicians is about, what Hancock calls, the lost global civilization that was wiped out by a flood in the Younger Dryas due to a comet impact in the ice caps in North America 10,800 BCE (c). A few years after this book was released an impact crater was found in Greenland and Ice core samples also prove the advent of mass flooding in a very quick period of time so it is not as much as stretch as it once was.

Magicians of the Gods: Updated and Expanded Edition ...

Brilliantly written and researched Magicians of the Gods, puts forward a very compelling case for the existence in remote antiquity of a highly advanced antediluvian civilisation. A civilisation that left behind tantalising evidence of its existence and a message for us - their descendants.

The focus of Magicians of the Gods is Hancock's belief that the end of the Younger Dryas period was caused by a celestial impact. This asteroid strike, or multiple strikes as he believes that it split in the atmosphere, was primarily focused upon the ice shelf at the Canadian/US border and created the scablands that we see there today.

BOOK REVIEW: Magicians of the Gods - Washington Times

Old Gods. "The Old Gods, the creators of the universe, of all magic itself. To Ember, we're like toys, but to them we're- we're cells. When we're harmless they ignore us, but when we become malignant, they amputate." ? Alice Quinn [src] The Old Gods are beings of thought and energy who created magic and the universe.

Old Gods | The Magicians Wiki | Fandom

Deities, more commonly referred to as gods, are beings of immense magical power who operate on a level far above most magicians and magical creatures. The Old Gods are the primordial entities that are responsible for the creation of the universe, magic, life and reality itself, as well as the 'parents' of the modern deities of mythology. Alice stated that to the modern gods of myth, humans are like toys, but to the Old Gods, they're like cells in a body.

Hancock’s new book, Magicians of the Gods (2015), is a direct sequel to Fingerprints, and a stepsibling to its earlier sequels, such as Heaven’s Mirror (1998) and Underworld (2002). The volume continues Hancock’s quest to find a lost civilization of high technology that he believes vanished during the Ice Age and was remembered only in a universal myth of the Great Flood.

Graham Hancock's multi-million bestseller Fingerprints of the Gods remains an astonishing, deeply controversial, wide-ranging investigation of the mysteries of our past and the evidence for Earth's lost civilization. Twenty years on, Hancock returns with a book filled with completely new, scientific and archaeological evidence, which has only recently come to light... The evidence revealed in this book shows beyond reasonable doubt that an advanced civilization that flourished during the Ice Age was destroyed in the global cataclysms between 12,800 and 11,600 years ago. Near the end of the last Ice Age 12,800 years ago, a giant comet that had entered the solar system from deep space thousands of years earlier, broke into multiple fragments. Some of these struck the Earth causing a global cataclysm on a scale unseen since the extinction of the dinosaurs. At least eight of the fragments hit the North

American ice cap, while further fragments hit the northern European ice cap. The impacts, from comet fragments a mile wide approaching at more than 60,000 miles an hour, generated huge amounts of heat which instantly liquidized millions of square kilometres of ice, destabilizing the Earth's crust and causing the global Deluge that is remembered in myths all around the world. A second series of impacts, equally devastating, causing further cataclysmic flooding, occurred 11,600 years ago, the exact date that Plato gives for the destruction and submergence of Atlantis. But there were survivors - known to later cultures by names such as 'the Sages', 'the Magicians', 'the Shining Ones', and 'the Mystery Teachers of Heaven'. They travelled the world in their great ships doing all in their power to keep the spark of civilization burning. They settled at key locations - Gobekli Tepe in Turkey, Baalbek in the Lebanon, Giza in Egypt, ancient Sumer, Mexico, Peru and across the Pacific where a huge pyramid has recently been discovered in Indonesia. With over 5 million copies sold worldwide of Fingerprints of the Gods, its New York Times bestselling sequel Magicians of the Gods brings new evidence supporting Hancock's thesis that a global cataclysm wiped out a great global civilization. On the heels of the very successful hardcover edition, Hancock returns with this paperback version including three new chapters brimming with recent reporting of fresh scientific advances (ranging from DNA to astrophysics) that substantially support his case. Twenty years ago, Graham Hancock published Fingerprints of the Gods an astonishing, deeply controversial investigation of the mysteries of and the evidence for Earth's lost prehistoric civilization. Twenty years after this massive bestseller debuted, Hancock returns with its sequel, filled with completely new scientific and archaeological evidence. Since 2007, a host of new proof has come to light supporting his theories through new archaeological discoveries. He travels to a wholly different set of ancient sites, including Gobekli Tepe, and brings entirely up to date and exciting material to the table for fans eagerly awaiting more evidence in favor of the prehistoric civilization. And, even more intriguing, he proposes an answer to the one question he could not answer in Fingerprints what caused this civilization to disappear. Magicians is poised perfectly for what his fans want to hear as well as for ushering in a new generation of readers.

Could the story of mankind be far older than we have previously believed? Using tools as varied as archaeo-astronomy, geology, and computer analysis of ancient myths, Graham Hancock presents a compelling case to suggest that it is. "A fancy piece of historical sleuthing . . . intriguing and entertaining and sturdy enough to give a long pause for thought."—Kirkus Reviews In Fingerprints of the Gods, Hancock embarks on a worldwide quest to put together all the pieces of the vast and fascinating jigsaw of mankind's hidden past. In ancient monuments as far apart as Egypt's Great Sphinx, the strange Andean ruins of Tihuanaco, and Mexico's awe-inspiring Temples of the Sun and Moon, he reveals not only the clear fingerprints of an as-yet-unidentified civilization of remote antiquity, but also startling evidence of its vast sophistication, technological advancement, and evolved scientific knowledge. A record-breaking number one bestseller in Britain, Fingerprints of the Gods contains the makings of an intellectual revolution, a dramatic and irreversible change in the way that we understand our past—and so our future. And Fingerprints of God tells us something more. As we recover the truth about prehistory, and discover the real meaning of ancient myths and monuments, it becomes apparent that a warning has been handed down to us, a warning of terrible cataclysm that afflicts the Earth in great cycles at irregular intervals of time—a cataclysm that may be about to recur. "Readers will hugely enjoy their quest in these pages of inspired storytelling."—The Times (UK)

"I suspect the real breakthroughs in our understanding of consciousness are going to come from an entirely different direction. That direction, controversially, has to do with psychedelics--which, as many of the contributors to The Divine Spark argue, offer spectacular potential for the investigation of the 'hard problem' of consciousness." --from the introduction by Graham Hancock

Powerful new evidence has emerged that supports Hancock's disturbing thesis of a massive global cataclysm in the window between 13,000 and 12,000 years ago, around the last Ice Age, that wiped out and destroyed almost all traces (except the 'fingerprints') of a great global civilisation of prehistoric antiquity. Hancock analyses the evidence emerging from popular science for events such as north America being struck by several pieces of a giant fragmenting comet, and the discovery in Turkey of an extraordinary 12,000 year-old megalithic site called Gobekli Tepe, on the scale of Stonehenge, but 7,000 years older than any of the great stone circles. Mysteries of this calibre drive the quest of Magicians of the Gods, each leading us to a labyrinth of further possibilities. Graham Hancock takes his original intuition of two phases of construction much further, exploring and investigating many mysterious ancient sites high in the Andes. His research also takes him to the Amazon, a rain forest that has been managed and cultured by human beings for millenia. From the Amazon, Graham follows the trail east, along the Atlantic ocean to the west coast of Africa, through the Sahara and on to Egypt. Magicians of the Gods satisfies the intellect and inspires the imagination. It transports readers for years to come with realms of mystery, enchantment and extraordinary possibilities.

The Instant New York Times Bestseller! Was an advanced civilization lost to history in the global cataclysm that ended the last Ice Age? Graham Hancock, the internationally bestselling author, has made it his life's work to find out--and in America Before, he draws on the latest archaeological and DNA evidence to bring his quest to a stunning conclusion. We've been taught that North and South America were empty of humans until around 13,000 years ago – amongst the last great landmasses on earth to have been settled by our ancestors. But new discoveries have radically reshaped this long-established picture and we know now that the Americas were first peopled more than 130,000 years ago – many tens of thousands of years before human settlements became established elsewhere. Hancock's research takes us on a series of journeys and encounters with the scientists responsible for the recent extraordinary breakthroughs. In the process, from the Mississippi Valley to the Amazon rainforest, he reveals that ancient "New World" cultures share a legacy of advanced scientific knowledge and sophisticated spiritual beliefs with supposedly unconnected "Old World" cultures. Have archaeologists focused for too long only on the "Old World" in their search for the origins of civilization while failing to consider the revolutionary possibility that those origins might in fact be found in the "New World"? America Before: The Key to Earth's Lost Civilization is the culmination of everything that millions of readers have loved in Hancock's body of work over the past decades, namely a mind-dilating exploration of the mysteries of the past, amazing archaeological discoveries and profound implications for how we lead our lives today.
